Revision History

| Date | Version | Notes |
|-------------------|--|---|
| February 28, 2017 | 1.0 | Initial Release |
| June 16, 2017 | 1.1 | |
| | TBA2-444767/B-Overview | Update Icons |
| | TBA2-FUR-REQ-249546/B-TBA2 Full Mode Functionality | Update button availability |
| | TBA2-FUR-REQ-249547/B-TBA2 Lite Mode Functionality | Update functions availability in Lite Mode. |
| | TBA2-FUR-REQ-249554/B-TBA2 HMI Display Requirements | Update HMI Requirements |
| | TBA2-FUR-REQ-249551/B-TBA2 Default Layouts When Error Occurs | Update default layouts |
| | TBA2-FUR-REQ-249556/B-TBA2 Soft Button Layout Strategy | Update layout strategy |
| | TBA2-FUR-REQ-249557/B-TBA2 Soft Button Selection Strategy | Update selection strategy |
| | TBA2-FUR-REQ-249558/B-TBA2 HMI Display Table | Update various table cells |
| | REQ-259039/A-Signal Mapping | Added new signals. |
| | TBA2-REQ-249599/B-TBA2 Feature ID Definition | Update table config values. |
| | TBA2-REQ-249602/B-TrailerBackupAssistMode_St | Update can signal parameters. |
| | TBA2-REQ-249609/B-TrailerBackupAssistMode_Rq | Update can signal descriptions |
| | REQ-259082/A-TBA Mode and TRG Mode | New requirement |
| | 457945/A-Requirements | New requirement |
| | TBA2-REQ-249617/B-TBA Mode | Update mode definition |
| | TBA2-REQ-249616/B-TRG Mode | Update Mode definition |
| | REQ-259041/A-TBA2 Setup Mode | New requirement |
| | TBA2-UC-REQ-249619/B-Start TBA2 Setup Display | Update Usecase |
| | TBA2-UC-REQ-249620/B-Enter Auto Mode After TBA2 Trailer Calibration Complete | Update Usecase |
| | TBA2-UC-REQ-249622/B-Cancel During TBA2 Setup | Update usecase |
| | TBA2-REQ-249677/B-Select A Trailer SD | Update SD |
| | TBA2-REQ-249678/B-Select Cancel Setup Button SD | Update SD |
| | TBA2-REQ-249679/B-Over Speed During Setup SD | Update SD |
| | TBA2-REQ-249625/B-TBA2 Full Mode Definition | Update SD |
| | TBA2-REQ-249680/B-TBA2 Auto Button Press SD | Update AD |
| | TBA2-REQ-249681/B-TBA2 Auto Mode Re-Entered SD | Update AD |
| | TBA2-REQ-249683/B-Left Button Press SD | Update SD |
| | TBA2-REQ-249684/B-Right Button Press SD | Update SD |
| | TBA2-REQ-249685/B-Zoom View SD | Update SD |
| | TBA2-REQ-249686/B-TBA2 Rear Normal View SD | Update AD |
| | TBA2-REQ-249687/B-Enter TBA2 Lite SD | Update SD |
| | TBA2-REQ-249691/B-Exit By Hard Button Press SD | Update SD |
| | TBA2-REQ-249692/B-Ignition Moved Out Of Run SD | Update SD |
| | REQ-259113/A-Advanced Mode Request | New requirement |
| | REQ-259114/A-Show Advanced Mode Button On Screen Inactive State | New requirement |
| | REQ-259115/A-Show Advanced Mode Button On Screen Active State | New requirement |
| | REQ-259116/A-Show Advanced Mode Button Not Shown On Screen | New requirement |
| | TBA2-UC-REQ-249657/B-TBA2 Advanced Mode Button Pressed | Update SD |
| | TBA2-UC-REQ-249658/B-TBA2 Advanced Mode Active | Update SD |
| | TBA2-UC-REQ-249659/B-TBA2 Advanced Mode Active Button Pressed | Update SD |
| | REQ-259118/A-Info Button Available | New Requirement |
| | REQ-259119/A-TBA2 Info PopUp Shown | New Requirement |
| | REQ-259120/A-Close TBA2 Info PopUp | New Requirement |
| | REQ-259121/A-TBA2 Info PopUp Text | New Requirement |
| | UC-REQ-266260/A-Request TRG Straight Back-Up Mode | New Requirement |

1 Overview

Feature Overview

TBA2 is a new feature which combines functionality from the two existing features TRG and TBA described below:

Trailer Reverse Guidance (TRG) is a Driver Assistance feature designed to provide customer with multiple views of the trailer, and overlays projecting trailer position and direction. As a camera system, TRG provides information and driving suggestions via the display in the center stack while the driver controls all vehicle motion. The system simply reacts to the trailer and steering angles or makes suggestions based on those inputs.

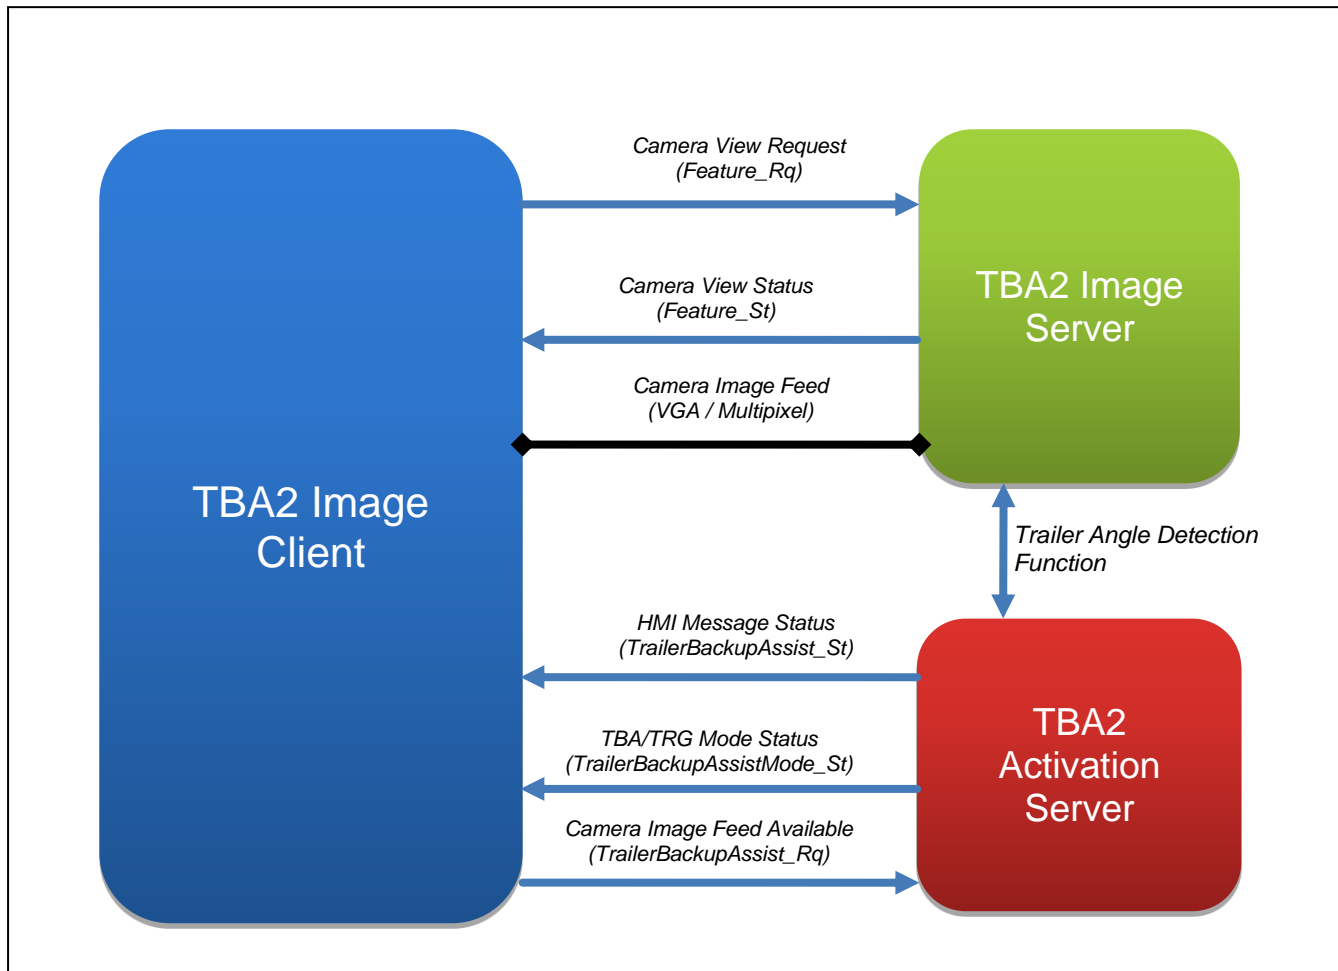

TRG is designed to help maneuver a trailer in reverse:

- Provides multiple views of the trailer (including static and dynamic overlays)
- Provides user with active trailer information including: current trailer angle, predicted future trailer angle, and dynamic jackknife warning zones
- Provides a dedicated mode for backing up straight

Trailer Backup Assist (TBA) is a system that allows the driver to continuously command a radius of curvature for the trailer as it is reversed. The system automatically steers the vehicle to achieve the commanded curvature while the driver controls the vehicle speed via the throttle and the brakes.

Trailer Backup Assist automatically steers as driver reverses the vehicle

- The Driver controls trailer trajectory (angle) by using the trailer steering knob.
- The Trailer Backup Assist algorithm determines the vehicle steering angle to achieve the desired trailer trajectory
- The Driver is in control of throttle and brake, while Trailer Backup Assist does the steering

HMI Overview

For a list of HMI layouts, refer to TBA2 HMI documentation.

2 General Requirements

2.1 TBA2-REQ-396833/A-Trailer Settings Configuration

This feature, Trailer Backup Assist 2, is closely related to Trailer Settings. In almost all programs the client serves as an interface to the user for both features, however in some unique programs Trailer Settings Client can reside in other modules. For those programs there is a configuration in this client to tell client that Trailer Settings resides in another module.

There are some changes that TBA2 Client needs to apply when Trailer Settings resides in another module. When client is configured like this: **Centerstack Settings = 0 AND TBA2 = 1** it means that Trailer Settings feature resides in another module.

A few other changes are located in SYNC4_TBA2_HmiStatus_coding document. Some text layouts are different. Refer to that file for the complete list of changes.

2.2 TBA2-REQ-396837/A-Trailer Settings Message

The client shall not transmit message 0x45C when **Centerstack Settings = 0 AND TBA2 = 1**

2.3 TBA2-FUR-REQ-249544/A-Available TBA2 Modes

Trailer Backup Assist 2 (TBA2) shall provide two levels of functions, TBA2 Full Mode and TBA2 Lite Mode, to serve different types of trailer use cases. Trailer Backup Assist 2 will also provide additional camera views the user can switch to with HMI overlays.

2.4 TBA2-FUR-REQ-249546/C-TBA2 Full Mode Functionality

TBA2 Full Mode shall provide full TBA2 functions that include TBA2 Auto 50/50 View, TBA2 Rear Normal View, TBA2 Rear 360, TBA2 CHMSL View, TBA2 Aux Camera View, TBA2 Auto Button, TBA2 Left button, TBA2 Right button, TBA2 Advanced Mode Button, TBA2 Info Button and TBA2 Exit Button.

Trailer set up process is required for TBA2 Full Mode. Trailer set up provides trailer information that is needed for TBA2 to automatically provide relevant trailer view from different angles through TBA2 Auto Mode.

2.5 TBA2-FUR-REQ-249547/C-TBA2 Lite Mode Functionality

TBA2 Lite Mode shall provide TBA2 functions without TBA2 Auto Mode. TBA2 Lite Mode includes TBA2 Lite 50/50 View, TBA2 Rear Normal View, TBA2 Rear 360, TBA2 CHMSL View, TBA2 Aux Camera View, TBA2 Left button, TBA2 Right button, TBA2 Info Button and TBA2 Exit button.

TBA2 Lite Mode does not require Trailer set up and can therefore be used for a non-conventional trailer, a vehicle with non-conventional brake type or for the customer who opts not to set up a trailer.

2.6 TBA2-FUR-REQ-249548/A-Default TBA2 AutoMode

When TBA2 Full Mode is activated the TBA2 Image Server shall default to Auto On.

2.7 TBA2-FUR-REQ-249549/B-TBA2 Interaction via Feature Based Message Protocol

Feature Base Message Protocol shall be used between TBA2 Image Client and TBA2 Image Server to synchronize and communicate the current camera view display (360, Normal) of TBA2 views. The Feature Base Message Protocol shall also be used between TBA2 Image Client and TBA2 Image Server to control TBA2 Auto Mode. The HMI Layout used by the TBA2 Image Client shall be determined by the camera view status provided by the TBA2 Image Server in order to ensure the HMI Layout applied by the Image Client is compatible with the Camera View supplied by the Image Server.

2.8 TBA2-FUR-REQ-249554/C-TBA2 HMI Display Requirements

The camera image shall be displayed during TBA2 operation whenever the following conditions are valid:

- A TBA2 Camera View is configured ON in the TBA2 Image Server
- A valid defined value of TrailerBackupAssist_St and TrailerBackupAssistMode_St in SYNC4_TBA2_HmiStatus_Coding.
- Vehicle speed does not exceed the camera display maximum speed.

2.9 TBA2-FUR-REQ-249551/B-TBA2 Default Layouts When Error Occurs

In the event that the value of these signals do not meet the criteria defined per TBA2 HMI layout definitions or that these signals are missing, then the respective soft button strategy layouts shall be displayed in the above scenario.

2.10 TBA2-FUR-REQ-249552/A-TBA2 Image Priority

Trailer Backup Assist 2 event shall be treated with the same screen interruption priorities as defined by H22a Screen Interruption Table.

2.11 TBA2-FUR-REQ-249553/A-Camera Image Priority

Once the camera image has been displayed to user, the image shall be maintained as long as the conditions required to be in the particular camera view are present and shall have highest priority:

- No pop-up screens shall interrupt the video image, except for pop-ups requested by TBA2 Activation Server.
- Media functions (source change, volume control, etc.) shall be available, but shall not interrupt the image view to the user.

2.12 TBA2-FUR-REQ-249555/B-TBA2 HMI Layouts Definitions

2.12.1 TBA2-FUR-REQ-249556/F-Show TBA2 View

TBA2 Camera Views

TBA2 Rear 360 View HMI Layout shall be displayed by the TBA2 Image Client when Feature_St has the encoding of FeatureID =0x081B , Configuration=0x12 TBA2 Rear 360

TBA2 Rear Normal View HMI Layouts shall be displayed by the TBA2 Image Client when Feature_St has the encoding of FeatureID =0x081B , Configuration=0x16 TBA2 Rear Normal

TBA2 50/50 View HMI Layouts shall be displayed by the TBA2 Image Client when Feature_St has the encoding of FeatureID =0x081B , Configuration=0x15 TBA2 50/50

TBA2 CHMSL View HMI Layouts shall be displayed by the TBA2 Image Client when Feature_St has the encoding of FeatureID =0x081B , Configuration=0x13 TBA2 CHMSL

TBA2 Aux View HMI Layouts shall be displayed by the TBA2 Image Client when Feature_St has the encoding of FeatureID =0x081B , Configuration=0x14 TBA2 Aux

This portion is applicable if Centerstack Settings = 0 AND TBA2 = 1

TBA2 Normal Rear view – no soft buttons shall be displayed when TrailerBackupAssist_St has a value of 0x04, 0x1A-0x1F
TBA2 Rear normal view with soft buttons shall be displayed when TrailerBackupAssist_St has a value of 0x05-0x19, 0x20-0x3F

Show TBA2 (H36s) View

A TBA2 view should be shown when a TBA2 Camera View is showing and 'Show TBA2 (H36s) View' is set to Yes in the Sync4_TBA2_HmiStatus_Coding document. A Non Camera Layout can be shown over a camera view per TBA2-REQ-330678-TBA2 Non Camera Layout.

2.12.2 TBA2-FUR-REQ-249557/C-TBA2 Soft Button Selection Strategy

Button location on screen is defined in the HMI spec H36s TBA2

When TrailerBackupAssistMode_St has a value of 0x1 TbaActive, 0x2 TbaSetup, 0x5 TbaActiveExpertAvail or 0x6 TbaActiveExpertActive

The available soft buttons to be shown if the requirements to show the soft button are met are:

TBA2 50/50 View Button, TBA2 Rear Normal View Button, TBA2 Rear 360 Button, TBA2 CHMSL View Button, TBA2 Aux Camera View Button, TBA2 Auto Button, TBA2 Left button, TBA2 Right button, TBA2 Advanced Mode Button and TBA2 Info Button.

When TrailerBackupAssistMode_St has a value of 0x3 TbaOffTrgSetup or 0x4 TbaOffTrgActive

The available soft buttons to be shown if the requirements to show the soft button are met are:

TBA2 50/50 View Button, TBA2 Rear Normal View Button, TBA2 Rear 360 Button, TBA2 CHMSL View Button, TBA2 Aux Camera View Button, TBA2 Auto Button, TBA2 Left button, TBA2 Right button, TBA2 Exit Button and TBA2 Info Button.

2.12.3 TBA2-FUR-REQ-249558/F-TBA2 HMI Display Table

The table provided in SYNC4_TBA2_HmiStatus_Coding is the summary of HMI layouts defined by TrailerBackupAssist_St and TrailerBackupAssistMode_St signals. For exact graphics for icons and layouts, please refer to the SYNC4_TBA2_HmiStatus_Coding document.

When Centerstack Settings = 0 AND TBA2 = 1, use the Variant 2 of the table.

2.13 TBA2-REQ-330678/B-TBA2 Non Camera Layout

| TrailerBackupAssist_St | TrailerBackupAssistMode_St | Vehicle Conditions | | | TBA2 Screen Layout |
|--|---|---------------------|----------------|-------------------|------------------------|
| | | Camera Status | Vehicle Speed | Gear Lever Select | |
| 0x14 0x15 0x16 0x18 0x20 0x21 0x22 0x24 0x25 0x2B 0x37 | 0x1 - TbaActive 0x2 - TbaSetup 0x3 TbaOffTrgSetup 0x4 TbaOffTrgActive 0x5 - TbaActiveExpertAvail 0x6 - TbaActiveExpertActive | Don't Care | Don't Care | Not Reverse | TBA2 Non-Camera Layout |
| All values with HMI text defined | All values with HMI text defined | Camera View Showing | Don't Care | Reverse | Camera Screen Overlay |
| All values with HMI text defined except 0x14, 0x15, 0x16, 0x18, 0x20, 0x21, 0x22, 0x24, 0x25, 0x2B, 0x37 | All values with HMI text defined | Camera View Showing | Speed < 10 kph | Not Reverse | Camera Screen Overlay |
| All values with HMI text defined | All values with HMI text defined | Camera View Showing | Speed >= 10kph | Not Reverse | TBA2 Non-Camera Layout |

For all other cases no TBA2 view should be shown.

3 Architectural Design

3.1 TBA2-REQ-259039/C-Signal Mapping

The table below gives the map of logical names used throughout this SPSS documentation and the actual signal name in the CAN database. The respective encodings follow in the subsequent paragraphs.

| Logical Signal Name | CAN Signal Name | Config |
|----------------------------|-----------------------|--------------------------------------|
| TrailerBackupAssist_St | TrlrAidMsgTxt_D2_Rq | Trailer Aid Signal Source = 01 |
| TrailerBackupAssistMode_St | TrlrAidEnbl_D2_Stat | Trailer Aid Signal Source = 01 |
| TrailerBackupAssistMode_Rq | TrlrAidMde_D_Rq | Trailer Aid Signal Source = 01 or 02 |
| TrailerBackupAssist_St | TrlrRvrseMsgTxt_D2_Rq | Trailer Aid Signal Source = 02 |
| TrailerBackupAssistMode_St | TrlrRvrseEnbl_D2_Stat | Trailer Aid Signal Source = 02 |

3.2 TBA2-CLD-REQ-249590/B-TBA2 Image Client

Responsibility:

The TBA2 Image Client is an interface of the TBA2 feature. The TBA2 Image Client is responsible for displaying Trailer images and providing some user interface based on the input from TBA2 Image Server.

Both Activation and Setup of TBA2 requires hand-shaking with the TBA2 Activation Client in order to synchronize proper HMI display to the user between the two image clients.

Review the implementation guide/static view/block diagram to locate the TBA2 Image Client object.

TBA Image Client is also responsible for coordination with TBA Activation server to setup the feature for use.

3.3 TBA2-IIR-REQ-249591/C-TBA2 Image Server

Responsibility:

The TBA2 Image Server is responsible for determination of views provided to TBA2 Image Client.

3.4 TBA2-CLD-REQ-249592/B-TBA2 Activation Server

Responsibility:

The TBA2 Activation Server is responsible for determining the instructions and TBA2 Status to the TBA2 Image Client and TBA2 Activation Client for display to the TBA2 feature user.

3.5 TBA2-CLD-REQ-250973/B-TBA2 Activation Client

Responsibility:

The TBA2 Activation Client is responsible for coordinating with the TBA2 Activation Server to setup the feature for use.

3.6 TBA2-IIR-REQ-249926/B-TBA2 Image Client Interface

3.6.1 TBA2-REQ-249598/B-TBA2 HMI Trailer Views and Instructions

Refer to requirement number 249558.

3.6.2 TBA2-MD-REQ-249599/F-TBA2 Feature ID Definition

The below table defines the Feature ID information related to the Feature Based Message Protocol command and control method for TBA2 (Note: Some of 0x81B is used in the Rear View Camera feature).

| Feature Name | Feature ID | Config Number | Config Value |
|-------------------|------------|---------------|-------------------------------|
| Camera Showing | 0x081B | 0x00 | Off |
| | | 0x01 | Front |
| | | 0x02 | Rear |
| | | 0x03 | Remote |
| | | 0x04 | Rear 360° |
| | | 0x05 | Rear Normal |
| | | 0x06 | Rear Split |
| | | 0x07 | Front 360° |
| | | 0x08 | Front Normal |
| | | 0x09 | Front Split |
| | | 0x0A | Rear Zoom |
| | | 0x0B | CHMSL |
| | | 0x0C | CHMSL Zoom |
| | | 0x0D | Aux |
| | | 0x0E | TRG |
| | | 0x0F | TRG Rear Normal |
| | | 0x10 | Straight Back Up Mode |
| | | 0x11 | TBA2 Rear Split |
| | | 0x12 | TBA2 Rear 360 |
| | | 0x13 | TBA2 CHMSL |
| | | 0x14 | TBA2 Aux |
| | | 0x15 | TBA2 50/50 |
| | | 0x16 | TBA2 Rear Normal |
| | | 0x37 | TBA2 TRAILER360 |
| | | 0x38 | TBA2 TRAILERREARNORMAL |
| | | 0x39 | TBA2 TRAILERINTERIOR_VIEW1 |
| | | 0x3A | TBA2 TRAILERINTERIOR_VIEW2 |
| | | 0x3B | TBA2 TRAILERLEFT |
| | | 0x3C | TBA2 TRAILERRIGHT |
| TRG Zoom In | 0x0820 | 0x00 | Off |
| | | 0x01 | Level 1 (Not used) |
| | | 0x02 | Level2 (Not Used) |
| | | 0x03 | Level3 |
| TRG Pan Button | 0x0823 | 0x01 | Left Press |
| | | 0x00 | Right Press |
| TRG Button Enable | 0x0824 | 0x00 | Disable Left |
| | | 0x01 | Disable Right |
| | | 0x02 | Enable Left |
| | | 0x03 | Enable Right |
| TRG Auto Mode | 0x0825 | 0x00 | Off |
| | | 0x01 | On |

| | | | |
|--------------------|--------|------|-------------------------|
| | | 0x02 | Not Available |
| TBA2 Auto Mode | 0x0826 | 0x00 | Off |
| | | 0x01 | On |
| | | 0x02 | Not Available |
| | | | |
| TBA2 Pan Button | 0x0827 | 0x01 | Left Press |
| | | 0x00 | Right Press |
| TBA2 Button Enable | 0x0828 | 0x00 | Disable Left |
| | | 0x01 | Disable Right |
| | | 0x02 | Enable Left |
| | | 0x03 | Enable Right |
| TBA2 Zoom In | 0x0829 | 0x00 | Off |
| | | 0x01 | Level 1 (Not used) |
| | | 0x02 | Level2 (Not Used) |
| | | 0x03 | Level3 |

| | | 0x01 | Picture In Picture View |
| | | 0x02 | Swap |

3.6.3 TBA2-IIR-REQ-249600/B-TBA2 ImageClient_Rx

3.6.3.1 TBA2-MD-REQ-249601/C-TrailerBackupAssist_St

Message Type: status

This signal is used to inform the TBA2 HMI what the current set up and backup maneuver instruction is. Each encoding of this signal will map to a specific set up or maneuver instruction. See the latest version of the SYNC4_TBA2_HmiStatus_Coding document maintained by the Driver Assistance feature group for the specific details of each "message" (Message1 – Message 63 listed below).

| Name | Literals | Value | Description |

3.6.3.2 TBA2-MD-REQ-249602/D-TrailerBackupAssistMode_St

Message Type: status

This signal is used to communicate the mode for the combined TBA2 feature. Encoding 0x1 – 0x2 and 0x5-0x6 indicates TBA mode and 0x3-0x4 indicates TRG mode. Within TBA Mode states 0x5 and 0x6 are used to activate TBA Advanced Mode. See the latest version of the SYNC4_TBA2_HmiStatus_Coding document maintained by the Driver Assistance feature group for the specific details of each state.

| TBA Status | Description |
|----------------|------------------|
| 0x0 - Inactive | TBA off/inactive |

| | |
|-----------------------------|--|
| 0x1 - TbaActive | TBA active |
| 0x2 - TbaSetup | TBA setup and calibration drive |
| 0x3 - TbaOffTrgSetup | TBA off, with TBA software controlling HMI for TRG setup |
| 0x4 - TbaOffTrgActive | TBA off, with TBA software controlling HMI for TRG |
| 0x5 - TbaActiveExpertAvail | TBA active, with Expert Mode available (Advanced Mode) |
| 0x6 - TbaActiveExpertActive | TBA active, with Expert Mode enabled (Advanced Mode) |
| 0x7 - NOT_USED | -- |

3.6.3.3 TBA2-MD-REQ-249603/B-Feature_St

Message Type: Status

Represents the current status of a feature (feature selected, feature setting, etc.).

Included Parameters:

FeatureID

Configuration

PersIndex

| Name | Literals | Value | Description |
|---------------|----------|-----------------|---|
| FeatureID | - | - | Active feature number |
| | | 0x0000 – 0xFFFF | |
| Configuration | - | - | Active configuration value |
| | | 0x0000 – 0xFFFF | |
| PersIndex | - | - | Indicates which personality profile is active |
| | PERS_1 | 0x0 | |
| | PERS_2 | 0x1 | |
| | PERS_3 | 0x2 | |
| | PERS_4 | 0x3 | |
| | VEHICLE | 0x4 | |
| | Not Used | 0x5 | |
| | Not Used | 0x6 | |
| | Not Used | 0x7 | |

3.6.3.4 TBA2-MD-REQ-249604/B-GearLvrPos_D_Actl

Message Type: Status

Vehicle status signal for the Gear Lever Position on an automatic transmission vehicle.

| Name | Literals | Value | Description |
|------|------------------|-------|-------------|
| Type | - | - | - |
| | Park | 0x0 | |
| | Reverse | 0x1 | |
| | Neutral | 0x2 | |
| | Drive | 0x3 | |
| | Sport_DriveSport | 0x4 | |

| | | | |
|--|---------------------------|-----|--|
| | Low | 0x5 | |
| | First | 0x6 | |
| | Second | 0x7 | |
| | Third | 0x8 | |
| | Fourth | 0x9 | |
| | Fifth | 0xA | |
| | Sixth | 0xB | |
| | Undefined_Treat_as_Fault | 0xC | |
| | Undefined_Treat_as_Fault1 | 0xD | |
| | Unknown_Position | 0xE | |
| | Fault | 0xF | |

3.6.3.5 TBA2-MD-REQ-249605/B-VehicleSpeed_St

Message Type: Status

Status used to indicate vehicle speed.

| Name | Literals | Value | Description |
|------|----------|---------------|--|
| Type | - | - | Indicates vehicle speed. Unit: kph Resolution:0.01 Offset:0 |
| | kph | 0x0 to 0xFFFF | |

3.6.3.6 TBA2-MD-REQ-249606/B-ParkBrake_St

Message Type: Status

Signal used to indicate the Parking Brake status.

| Name | Literals | Value | Description |
|------|----------|-------|-------------|
| Type | - | - | - |
| | Inactive | 0x0 | |
| | Active | 0x1 | |

3.6.4 TBA2-IIR-REQ-249607/B-TBA2 ImageClient_Tx**3.6.4.1 TBA2-MD-REQ-249612/B-Feature_Rq**

Message Type: Request

Represents the request to command a feature change (select new feature, change feature setting, query features, etc.).

Included Parameters:

Operation

FeatureID

Configuration

PersIndex

| Name | Literals | Value | Description |
|-----------|----------|-------|-----------------------------------|
| Operation | - | - | Type of operation being requested |
| | Null | 0x0 | |
| | Query | 0x1 | |

| | | | |
|---------------|----------|-----------------|---|
| | Set | 0x2 | |
| | Upload | 0x3 | |
| | Restore | 0x4 | |
| | Copy | 0x5 | |
| | NotUsed | 0x6 – 0x7 | |
| FeatureID | - | - | Feature number being requested |
| | | 0x0000 – 0xFFFF | |
| Configuration | - | - | Configuration value being requested |
| | | 0x0000 – 0xFFFF | |
| PersIndex | - | - | Indicates which personality profile is being accessed |
| | PERS_1 | 0x0 | |
| | PERS_2 | 0x1 | |
| | PERS_3 | 0x2 | |
| | PERS_4 | 0x3 | |
| | VEHICLE | 0x4 | |
| | Not Used | 0x5 | |
| | Not Used | 0x6 | |
| | Not Used | 0x7 | |

3.6.4.2 TBA2-MD-REQ-249608/B-CancelTrailerBackupAssist_Rq

Message Type: Request

The signal is used to deactivate the Trailer Backup Assist2 feature in the event the camera feed is missing. The signal is sent from the Trailer Backup Assist 2 Image Client to the Trailer Backup Assist 2 Activation Server when the Trailer Backup Assist 2 feature is activated (TrailerBackupAssist_St >=4) but the Trailer Backup Assist 2 Image Client does not detect a Rear Camera video feed from Trailer Backup Assist 2 Image Server. The TBA 2 Image Client shall broadcast this value until the TBA 2 feature is deactivated (TrailerBackupAssist_St < 4).

| Name | Literals | Value | Description |
|------|----------|-------|-------------|
| Type | - | - | - |
| | Null | 0x0 | |
| | Cancel | 0x1 | |

3.6.4.3 TBA2-MD-REQ-249609/C-TrailerBackupAssistMode_Rq

The TBA2 feature will include an Advanced Mode which can be requested by the user and is communicated to the TBA2 Activation Server through the following signal:

| Encoding | Description |
|------------------|--------------------------|
| 0x0 NotRequested | No mode change requested |
| 0x1 Mode1 | Mode1 toggle requested |
| 0x2 Mode2 | Mode2 toggle requested |
| 0x3 Mode3 | Mode3 toggle requested |

**3.6.5 TBA2-MD-REQ-249610/B-Sending of Request and Response for TBA Feature**

Requirement, IFS-MMCAN-FUR-REQ-015114-Sending of Request and Response (TcSE ROIN-66252-1), is not valid for the either Trailer Backup Assist (TBA) or Trailer Reverse Guidance (TRG) features. Request signals used for TBA and TRG shall behave similar to status signals such that the current state of the signal is always a valid condition (they will not revert to "inactive" automatically).

4 Functional Definition

4.1 TBA2-REQ-259082/B-TBA Mode and TRG Mode

4.1.1 Requirements

4.1.1.1 TBA2-REQ-249617/B-TBA Mode

TBA Mode is defined when TrailerBackupAssistMode_St is equal to 0x1 TbaActive, 0x2 TbaSetup, 0x5 TbaActiveExpertAvail, or 0x6 TbaActiveExpertActive.

4.1.1.2 TBA2-REQ-249616/B-TRG Mode

TRG Mode is defined when TrailerBackupAssistMode_St is equal to 0x3 TbaOffTrgSetup or 0x4 TbaOffTrgActive.

4.2 TBA2-REQ-249618/A-TBA2 Setup

4.2.1 Requirements

4.2.1.1 TBA2-REQ-259041/B-TBA2 Setup Mode

TBA2 Setup Mode is defined when HMI Layout 'TBA2 Normal Rear view – no soft buttons' should be shown.

4.2.2 Use Cases

4.2.2.1 ***TBA2-UC-REQ-249619/B-Start TBA2 Setup Display***

| | |
|------------------------------------|--|
| Actors | Vehicle Occupant |
| Pre-conditions | <ul style="list-style-type: none">Ignition status is Run/StartTBA2 Setup has begun for a trailer in TBA2 Setup Mode (from the TBA2 Activation Client) |
| Scenario Description | Driver selects to set up a trailer as TBA2 trailer (from the TBA2 Activation Client) |
| Post-conditions | The vehicle leaves from current screen to a TBA2 view. |
| List of Exception Use Cases | E1 – Vehicle not in RUN/START E2 – Loss of communication with Camera server E3 – Valid camera video signal not present |
| Interfaces | G-HMI Vehicle System Interface |

4.2.2.2 ***TBA2-UC-REQ-249620/B-Enter Auto Mode After TBA2 Trailer Calibration Complete***

| | |
|------------------------------------|---|
| Actors | Vehicle Occupant |
| Pre-conditions | <ul style="list-style-type: none">Ignition status is Run/StartDriver calibrates trailer correctly |
| Scenario Description | Customer completes trailer calibration |
| Post-conditions | <ul style="list-style-type: none">TBA2 Setup and Calibration completeTBA2 Full mode automatically is activatedThe vehicle displays TBA2 Full Mode 50/50 View image if TBA2 Lite 50/50 View was previously displayed |
| List of Exception Use Cases | E1 – Vehicle not in RUN/START E2 – Loss of communication with IPMB module |

| | |
|-------------------|--|
| | E3 – Valid camera video signal not present |
| Interfaces | G-HMI Vehicle System Interface |

4.2.2.3 TBA2-UC-REQ-249621/A-Enter TBA2 Default View after Trailer is Detected

| | |
|------------------------------------|---|
| Actors | Vehicle Occupant |
| Pre-conditions | <ul style="list-style-type: none">Ignition status is Run/StartThe driver presses TRG button at RVC view for TRG Mode or Presses the TBA Knob for TBA ModeThe driver selects a trailer at message centerThe vehicle searches for trailer template |
| Scenario Description | Vehicle identifies trailer template |
| Post-conditions | <ul style="list-style-type: none">TBA2 Default TBA2 View is automatically is activatedThe vehicle displays TBA2 Auto Mode 50/50 View image if TBA2 Lite 50/50 View was previously displayed |
| List of Exception Use Cases | E1 – Vehicle is no longer in RUN/START E2 – Loss of communication with Camera server E3 – Valid camera video signal not present |
| Interfaces | G-HMI Vehicle System Interface |

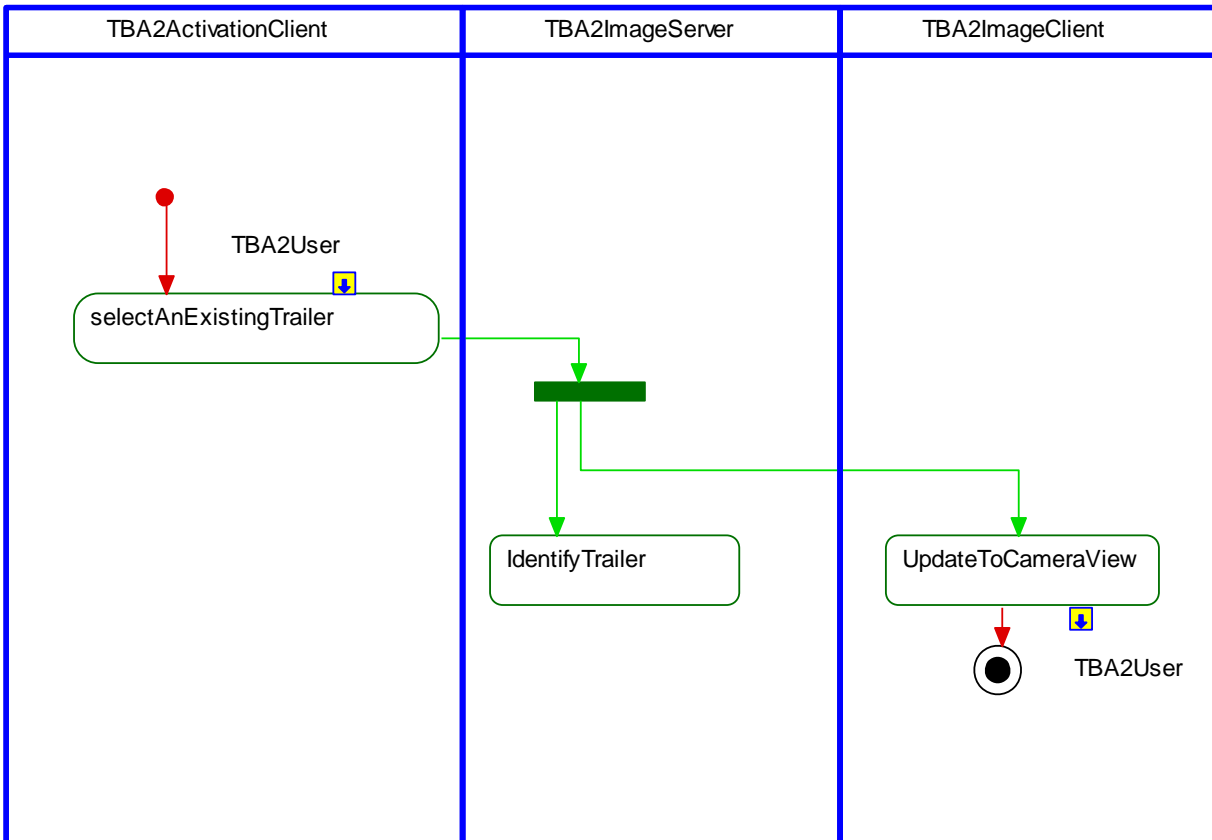

4.2.2.4 TBA2-UC-REQ-249622/B-Cancel During TBA2 Setup

| | |
|------------------------------------|--|
| Actors | Vehicle Occupant |
| Pre-conditions | <ul style="list-style-type: none">Ignition status is Run/StartTBA2 is active |
| Scenario Description | Driver cancels TBA2 Setup. |
| Post-conditions | The vehicle displays TBA2 Lite Mode or camera default mode |
| List of Exception Use Cases | E1 – Vehicle not in RUN/START E2 – Loss of communication with IPMB module E3 – Valid camera video signal not present |
| Interfaces | G-HMI Vehicle System Interface |

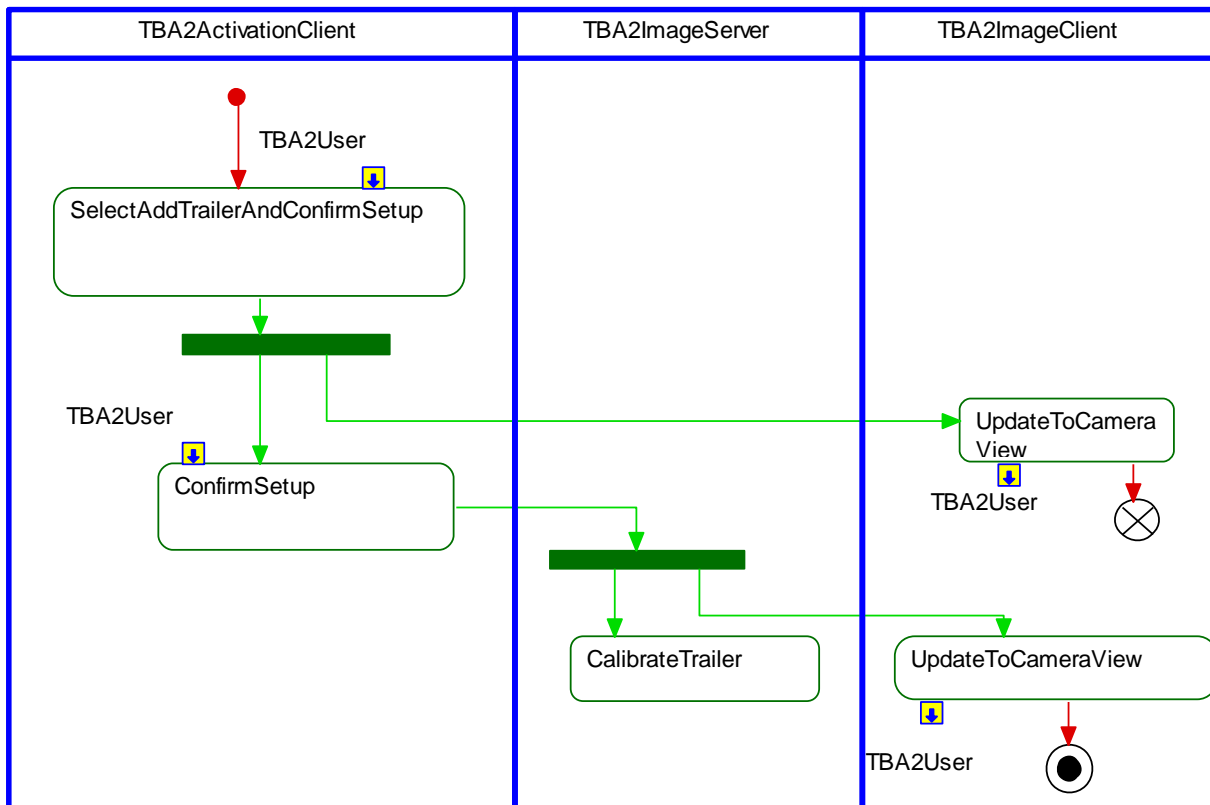

4.2.3 White Box View

4.2.3.1 TBA2-REQ-249662/A-Select Trailer AD

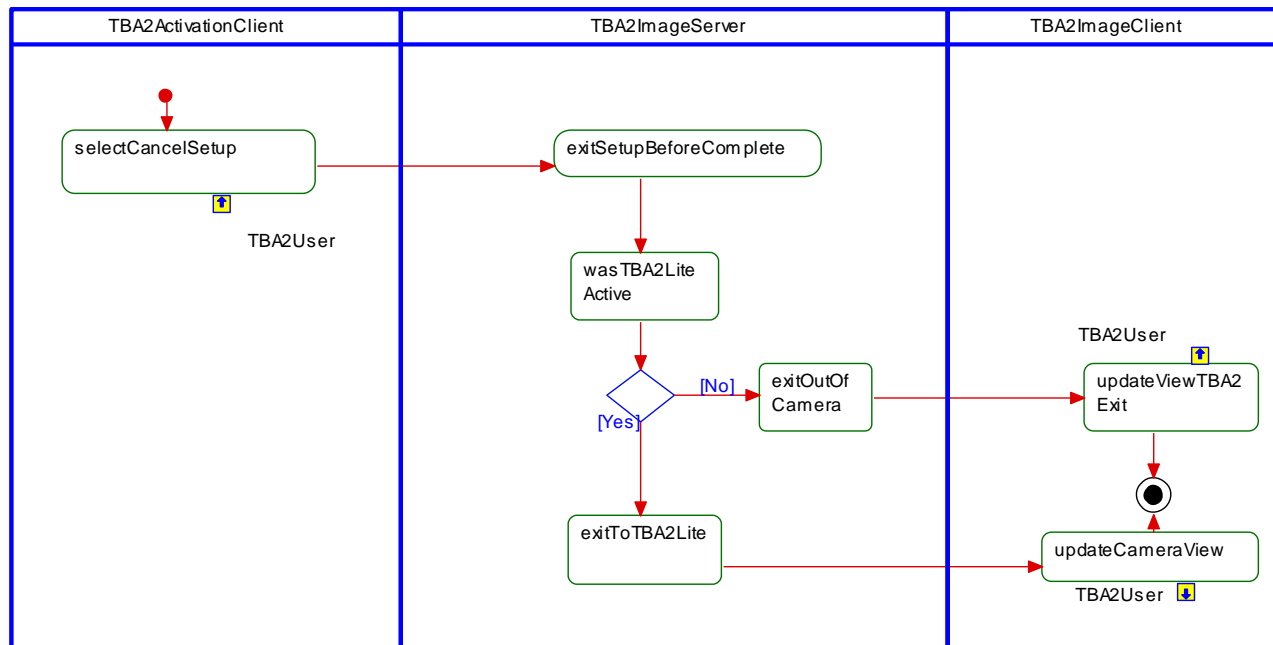

4.2.3.2 TBA2-REQ-249663/A-Setup New Trailer AD

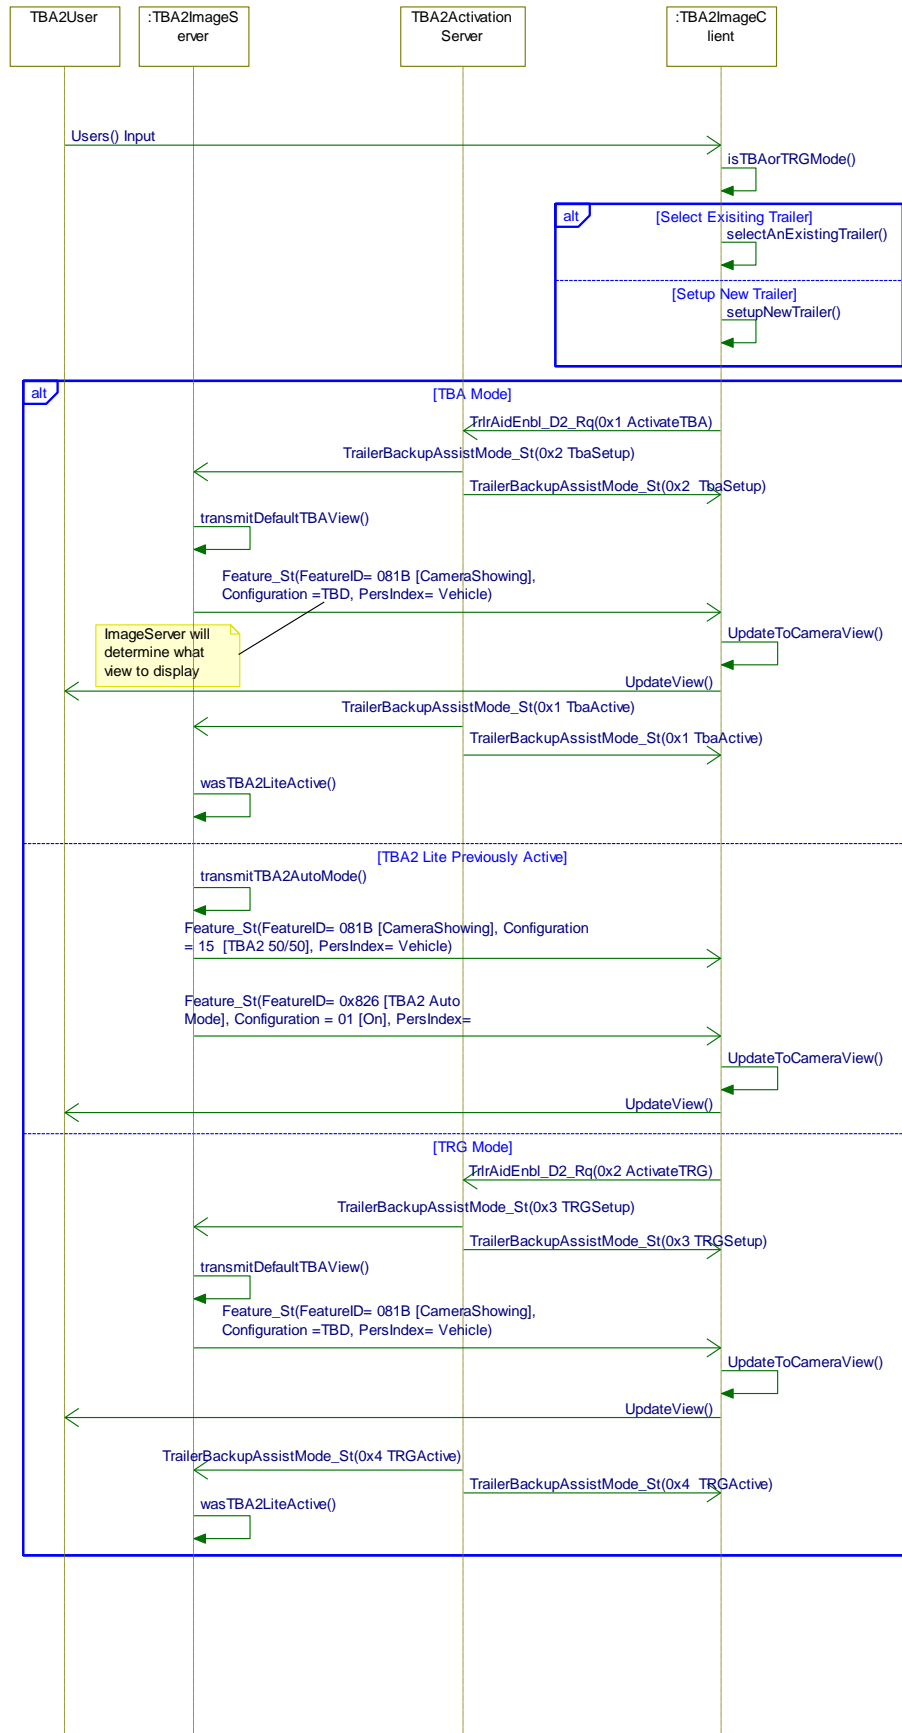

4.2.3.3 TBA2-REQ-249664/A-Cancel Button During Setup AD

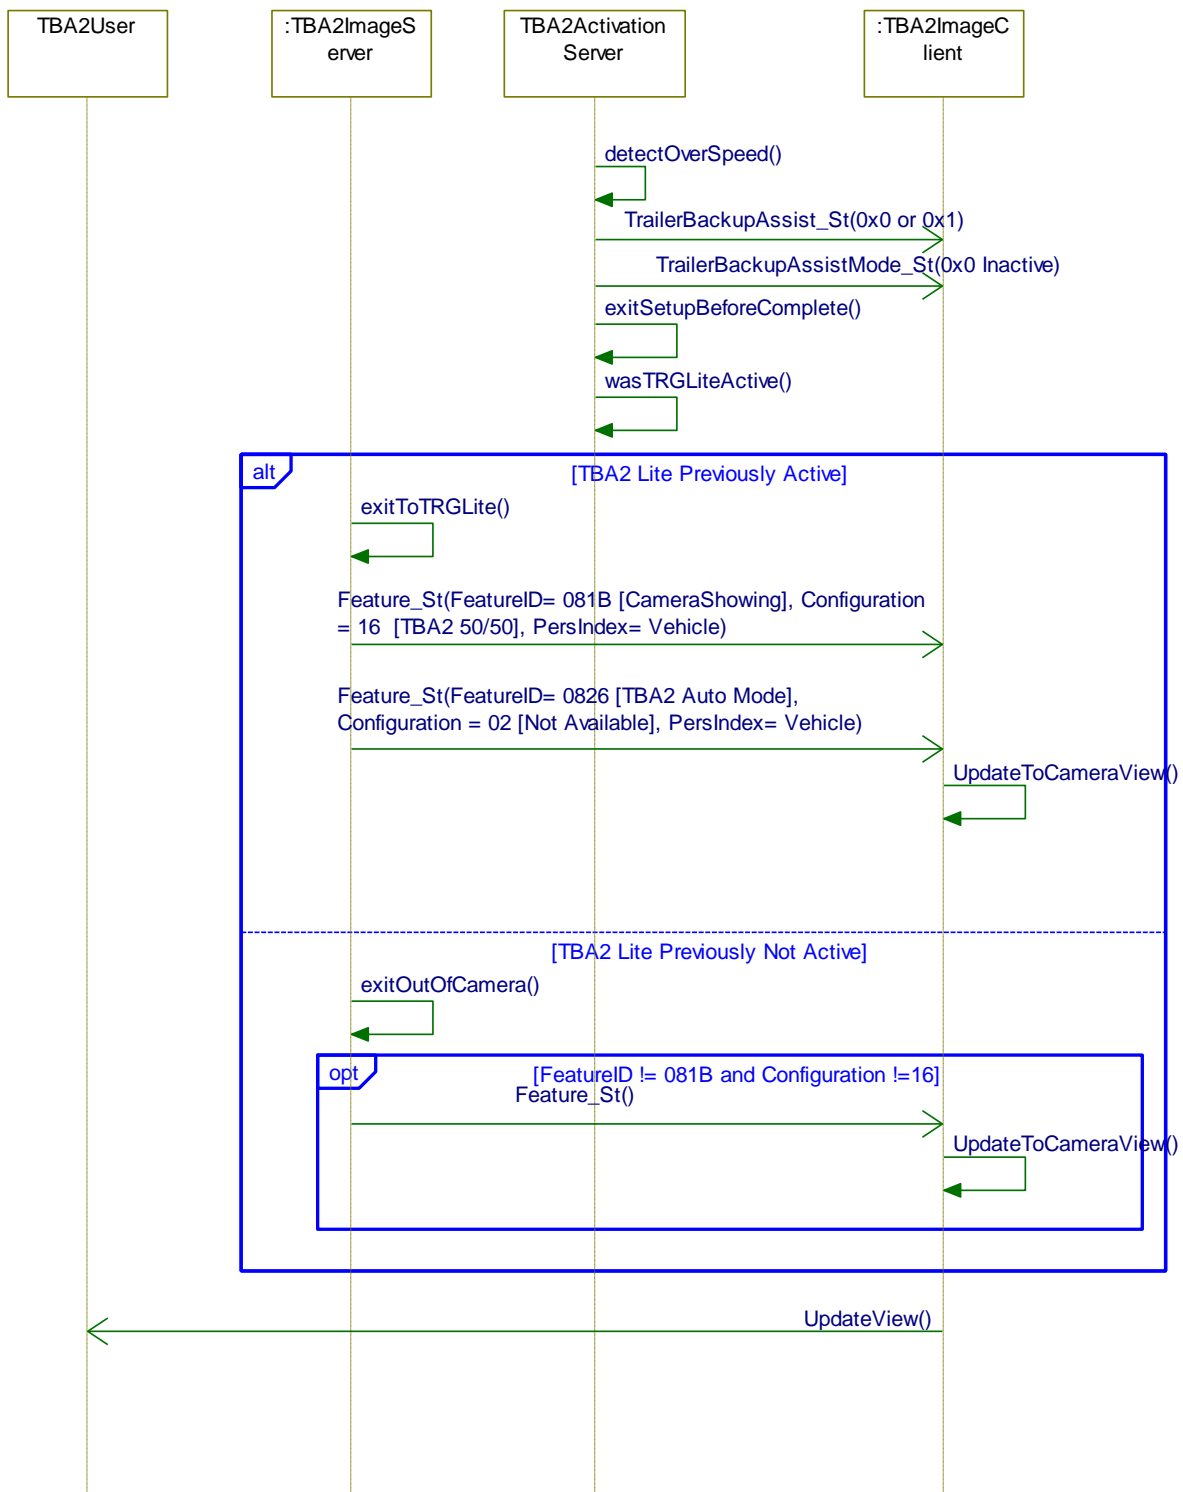

4.2.3.4 TBA2-REQ-249677/C-Select A Trailer SD

4.2.3.5 TBA2-REQ-249679/C-Over Speed During Setup SD

4.3 TBA2-REQ-249624/A-TBA2 Full Mode

4.3.1 Requirements

4.3.1.1 TBA2-REQ-249625/B-TBA2 Full Mode Definition

TBA2 Full mode is defined by two Feature ID: Camera Showing (0x081B) and TBA2 Auto Mode (0x0826).
TBA2 Image Client shall display TBA2 Full Mode when 0x081B has value of 0x15 and 0x0826 has value of 0x01 or 0x00.

4.3.2 Use Cases

4.3.2.1 TBA2-UC-REQ-249626/A-Deactivate TBA2 Auto Mode When Available

| | |
|------------------------------------|---|
| Actors | Vehicle Occupant |
| Pre-conditions | <ul style="list-style-type: none">Ignition status is Run/StartTBA2 Auto Mode has been activated |
| Scenario Description | Driver presses Auto button or Driver presses Left button or Driver presses Right button |
| Post-conditions | TBA2 leaves out Auto mode and moves to TBA2 regular view , TBA2 Right view or TBA2 Left view pending on which button is pressed |

4.7 TBA2-REQ-249642/A-TBA2 Exit

4.7.1 Requirements

4.7.1.1 TBA2-REQ-249643/A-Cancel Trailer Backup Assist 2 when Camera Feed is Missing

In the event the camera feed is missing, the Trailer Backup Assist 2 Image Client shall set CancelTrailerBackupAssist_Rq to the value of 0x01 for the duration of TrailerBackupAssist_St \geq 0x4 . Once TrailerBackupAssist_St is $<$ 4 , CancelTrailerBackupAssist_Rq shall be set to 0x0_Null again

4.7.1.2 TBA2-REQ-249644/A-Trailer Backup Assist Maximum Speed

Trailer Backup Assist has no maximum or minimum speed defined for the TBA2 Image Client. This parameter is a calibration value inherent to the TBA2 Activation Server and shall not be determined by the TBA2 Image Client as it may change through development of the feature and depending on vehicle program or market. The TBA2 Image Client shall not set CancelTrailerBackupAssist_Rq for maximum or minimum speed.

4.7.2 Use Cases

4.7.2.1 TBA2-UC-REQ-249648/A-Exit TBA2 Feature by Pressing Hard Button

| | |
|------------------------------------|--|
| Actors | Vehicle Occupant |
| Pre-conditions | <ul style="list-style-type: none">Ignition status is Run TBA2 is activated |

4.8 TBA2-REQ-259117/A-TBA2 Info Button and Info PopUp

4.8.1 Requirements

4.8.1.1 TBA2-REQ-259118/B-Info Button Available

The TBA2 Info Button should be shown on the display and available to be pressed by the user only when the vehicle is in Park. Refer to HMI spec H36s for more details. If [No TBA2 Info Button] is defined by *TBA2-FUR-REQ-249558/B-TBA2 HMI Display Table* for given values of TrailerBackupAssist_St and TrailerBackupAssistMode_St, then no Info Button should be shown.

4.8.1.2 TBA2-REQ-259119/B-TBA2 Info PopUp Shown

The TBA2 Info Pop-Up should be shown when TrailerBackupAssist_St transitions to 0x32 (Message 50) or when the user presses the TBA2 Info Button

4.8.1.3 TBA2-REQ-259120/B-Close TBA2 Info PopUp

The TBA2 Info Pop-Up should be closed when TrailerBackupAssist_St transitions from 0x32 (Message 50), when the user presses the Ok button to dismiss the pop-up or when the vehicle is NOT in Park.

If [No TBA2 Info Button] is defined by *TBA2-FUR-REQ-249558/B-TBA2 HMI Display Table* for given values of TrailerBackupAssist_St and TrailerBackupAssistMode_St then no PopUp should be shown on screen.

4.8.1.4 TBA2-REQ-259121/B-TBA2 Info PopUp Text

The text shown in the Pop-up is defined in the document SYNC4_TBA2_HmiStatus_Coding.

4.9 TBA2-REQ-266258/A-TRG Straight Back Up Mode Button

4.9.1 **Straight Back Up Mode Button**

The Straight back-Up Mode Button should be shown only when

- TrailerBackupAssistMode_St == 0x4_TbaOffTrgActive

4.11 TBA2-FUN-REQ-525057/A-Trailer Settings Related Changes

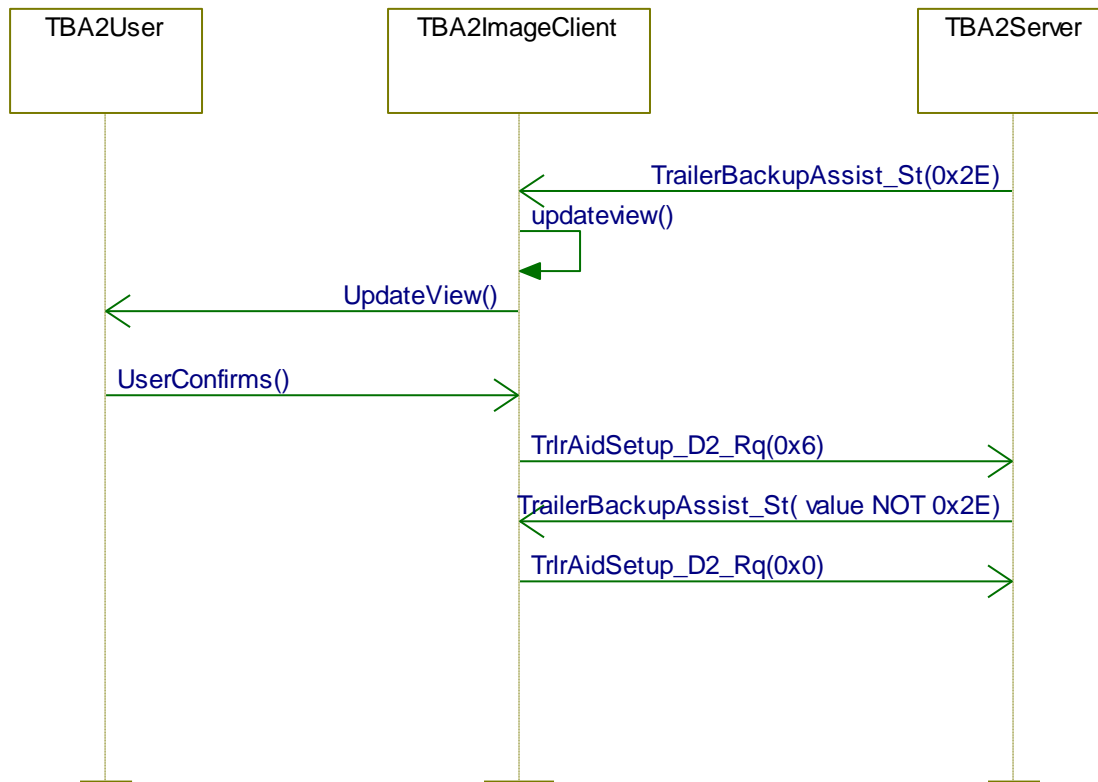

4.11.1 TBA2-REQ-525058/A-Signal Sharing

Signals used in TBA2 feature could be used by other features. However, the servers of the features know what is intended for their feature by the various parameters that client transmits.

To not "confuse" the features or the servers, Client shall keep track of what feature triggers certain sequences and shall answer with the parameters that the particular feature that triggered the sequence, needs to see answers.

4.11.2 TBA2-REQ-326574/B-Place Sticker SD

Sequence Diagram works for Both 0x2E (Place sticker now) and 0x2F (Setup Complete Return to Trailer settings).
