AHT-FUR-REQ-294567/C-Auto Hitch Maximum Speed	ashepele: Removed reference to TBA feature
FUR-REQ-319291/A-Cancel Auto Hitch on Request from Driver+	Work in progress
FUR-REQ-319291/B-Cancel Auto Hitch on Request from Driver	ashepele: Re-worded for clarity
AHT-ACT-REQ-302424/B-Auto Hitch AD	tmertiri:remove trailerhitchball from AD
AHT-SD-REQ-302425/B-Auto Hitch SD	tmertiri: remove trailerhitchball from SD

March 21, 2019

1.2

AHT-FRD-REQ-276908/D-Auto Hitch	ndecia: Updated overall spec structure for better readability
499217/F-HMI Overview	gkaur12: Updated Sample views layout image.
530448/D-Auto Hitch Client Interface	ndecia: Updated sub-elements to improve overall spec structure
AHT-FUR-REQ-294538/E-AH Feature ID Definition	ndecia: Added ellipsis to denote presence of values after Auto Hitch Rear Normal
AHT-FUR-REQ-294546/E-DriverInput	ndecia: Updated spelling of value names to be consistent with their references from other requirements
476743/D-General Requirements	ndecia: updated structure
AHT-FUR-REQ-294554/D-Camera Image Priority	ndecia: added reference to Screen Interruption Table and added requirement when to clear popups
AHT-FUR-REQ-294553/B-Auto Hitch Image Priority	ndecia: Updated reference to Screen Interruption Table
AHT-FUR-REQ-294555/B-Autohitch Views	gkaur12: added configuration value for AutoHitch Rear Normal View.
AHT-FUR-REQ-347436/A-Autohitch HMI content references	gkaur12: added configuration value for AutoHitch Rear Normal View.
476744/E-Functional Definition	ndecia: Added new requirements under this heading
AHT-FUN-REQ-343875/A-Display Auto Hitch	ndecia: New function heading added to improve overall spec structure
AHT-FUR-REQ-323563/C-Info Button Availability	gkaur12: updated image and requirement text.
AHT-FUR-REQ-294562/C-Auto Hitch Signal Processing - Positional Icon1	gkaur12: updated icon table
AHT-FUR-REQ-346645/A-Auto Hitch Signal Processing - Positional Instructions	gkaur12: Updated Text table with Manual/Automatic column. ndecia: Removed all references to explicitly defined text strings and graphical HMI content. Added references to the AutoHitch HMI Text Mapping Table document where this will now be captured
FUR-REQ-320255/B-Handoff to Trailer Domain Menu	ndecia: Added detail on signal handling for setting DriverInput back to 0x0 NoRequest upon a value change in AutoHitch_St.
FUR-REQ-319885/D-Feature Selection by Soft Buttons	ndecia: Updated to add detail on setting signal value back to 0x0 No_Request upon a value change in the AutoHitch_St signal
FUR-REQ-320255/B-Handoff to Trailer Domain Menu	ndecia: Added detail on signal handling for setting DriverInput back to 0x0 NoRequest upon a value change in AutoHitch_St.
FUR-REQ-319885/D-Feature Selection by Soft Buttons	ndecia: Updated to add detail on setting signal value back to 0x0 No_Request upon a value change in the AutoHitch_St signal
FUR-REQ-343766/A-TBA Selection by Soft Button	ndecia: added new requirement for a new TBA soft button on the autohitch screen to take you directly to the TBA feature
FUR-REQ-347395/A-Continue Selection by Soft Button	ndecia: added new requirement for a new TBA soft button on the autohitch screen to take you directly to the TBA feature
FUR-REQ-347435/A-Start Over Selection by Soft Button	ndecia: added new requirement for a new TBA soft button on the autohitch screen to take you directly to the TBA feature
AHT-SD-REQ-302425/C-Auto Hitch SD	ndecia: Update sequence diagram to correct spelling of DriverInput and to add the presence of the AutoHitch_St message after the DriverInput message is sent

September 13, 2019

1.3

STR-624084/B-Requirements	ndecia: Removed Trailering Domain requirement 320255 as it is not supported in the HMI
AHT-FUR-REQ-346645/B-Auto Hitch Signal Processing - Positional Instructions	ndecia: Update to Message59 of the table, and added a command to switch to the Trailering Menu in Message63, with an corresponding description of this command in the note below the table. Corrected Message28 to be Automatic only.
FUR-REQ-319884/D-Auto Hitch Soft Button Requirements	ndecia: Removed unintentionally duplicated requirements 320255 & 319885

FUR-REQ-319885/E-Feature Selection by Soft Buttons

ndecia: Updated screen layout wireframe to include Pro Trailer Info button, and included requirement to transition to the Info screen from reference 12 of the text mapping table document.

FUR-REQ-347395/B-Continue Selection by Soft Button

ndecia: Update to pop-up layout and signal handling to include a new autohitch button and a cancel button.

AHT-FUR-REQ-319291/C-Cancel Auto Hitch on Request from Driver

ndecia: added clarification to reset DriverInput back to NoRequest to align with other requirements where that has already been stated.

December 6, 2019

1.4

AHT-FUR-REQ-294552/G-AH HMI Display Requirements

ndecia: added reference to "Rear Hitch" view

AHT-FUR-REQ-294555/C-Autohitch Views

ndecia: added reference to "Rear Hitch" view

STR-624084/C-Requirements

ndecia: revised structure to add requirements 371605 & 371606

AHT-FUR-REQ-346645/C-Auto Hitch Signal Processing - Positional Instructions

ndecia: added reference to Text Mapping table for Message60 (0x3C)

REQ-371605/A-Driver Early Abort Selection by Soft Button

ndecia: new requirement

REQ-371606/A-AutoHitch "Rear Normal" view and "Rear Hitch" view

ndecia: new requirement

August 16, 2021

1.5

AHT-FUR-REQ-294538/F-AH Feature ID Definition

ndecia: updated table to only include relevant camera view values

476743/E-General Requirements

ndecia: revised structure to add new requirement 397066

AHT-FUR-REQ-294552/H-AH HMI Display Requirements

ndecia: included Auto Hitch Rear Camera Zoom view in first bullet point and updated last bullet point to refer to new exception to display message44 or 45 regardless of vehicle speed

AHT-FUR-REQ-294555/D-Autohitch Views

ndecia: added Rear Zoom View to the Rear Hitch View layouts section

AHT-FUR-REQ-397066/A-Autohitch Vehicle Speed Exception

ndecia: new requirement to add exception to display message44 or 45 regardless of vehicle speed

STR-624084/D-Requirements

ndecia: revised structure to include new requirement 422924

AHT-FUR-REQ-294562/D-Auto Hitch Signal Processing - Positional Icon1

ndecia: added new icons for values 0x4, 0x5, and 0xD

FUR-REQ-422924/A-Alternate Feature Selection by Soft Buttons

ndecia: New screen layout

REQ-371606/B-AutoHitch "Rear Normal" view and "Rear Hitch" view

ndecia: updated to include the Autohitch Rear Zoom View

499274/D-Requirements

ndecia: revised structure to remove req 294567, due to potential conflict with other requirements referring to vehicle speed

STR-634010/B-Appendix: Reference Documents

ndecia: updated to include text mapping table version

1 Architectural Design

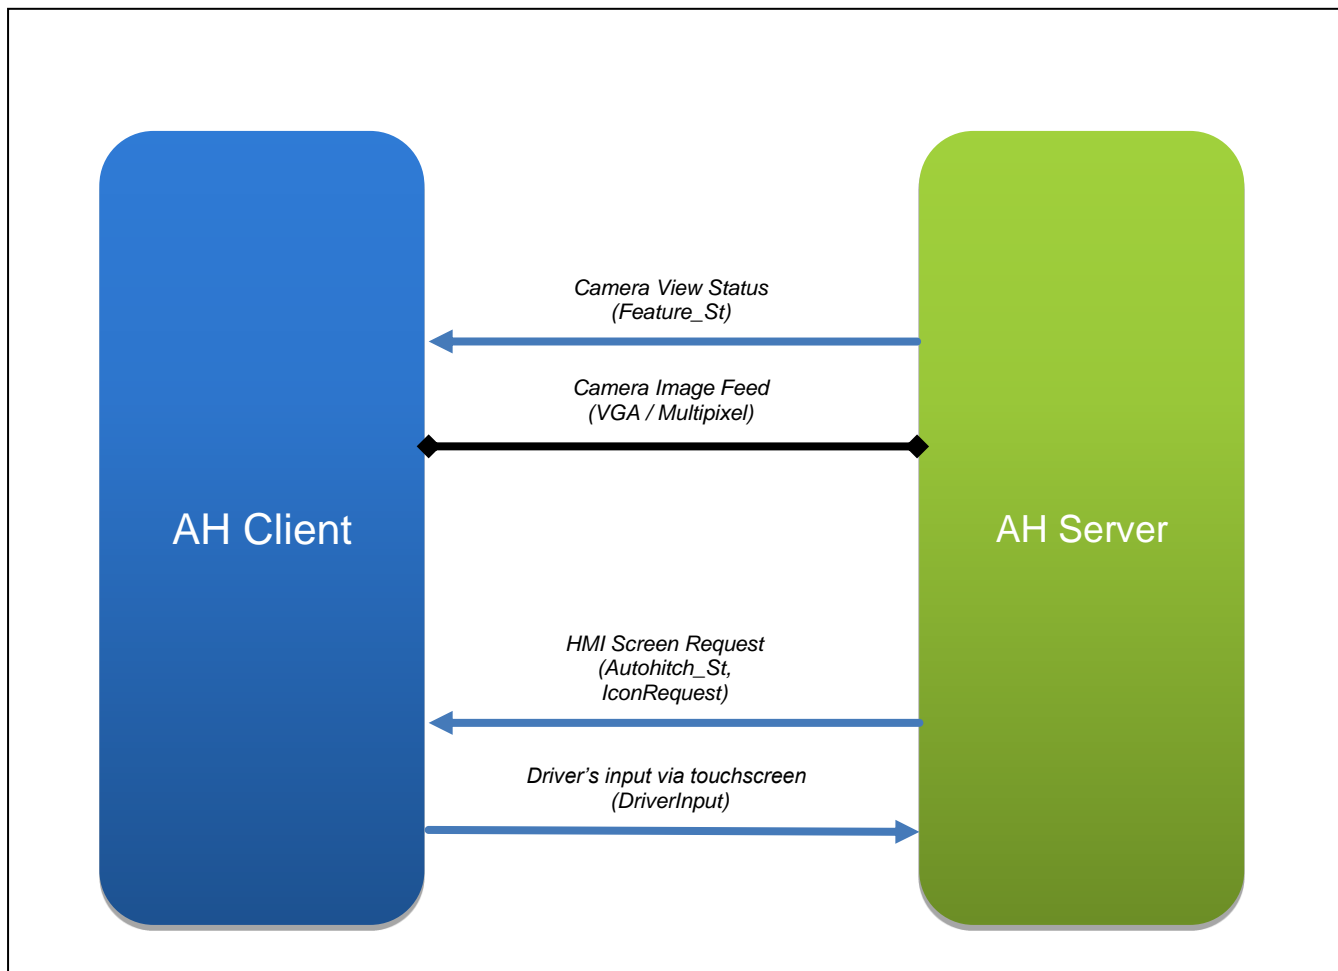

1.1 Feature Overview

Feature Overview:

Auto Hitch is a new advanced driver assistance feature that is designed to improve a user's experience while hooking up a trailer.

Auto Hitch (AH) is a system that automatically aligns a vehicle's hitch ball with a trailer tongue coupler in preparation for hitching a trailer. It relies on the driver to position the vehicle within range of a compatible trailer and then utilizes sensors to detect the trailer and automatically maneuver into alignment.

Auto Hitch controls the steering, brakes, and throttle in a way that allows the user to simply lower the trailer onto the vehicle's hitch ball after completion of the Auto Hitch maneuver.

1.2 HMI Overview

HMI Overview

The layout naming used in this spec are used only for convenience in naming and should not to be used when comparing layouts named in other specifications such as HMI specs or elsewhere. Refer to Appendix for a potential list of related documentation

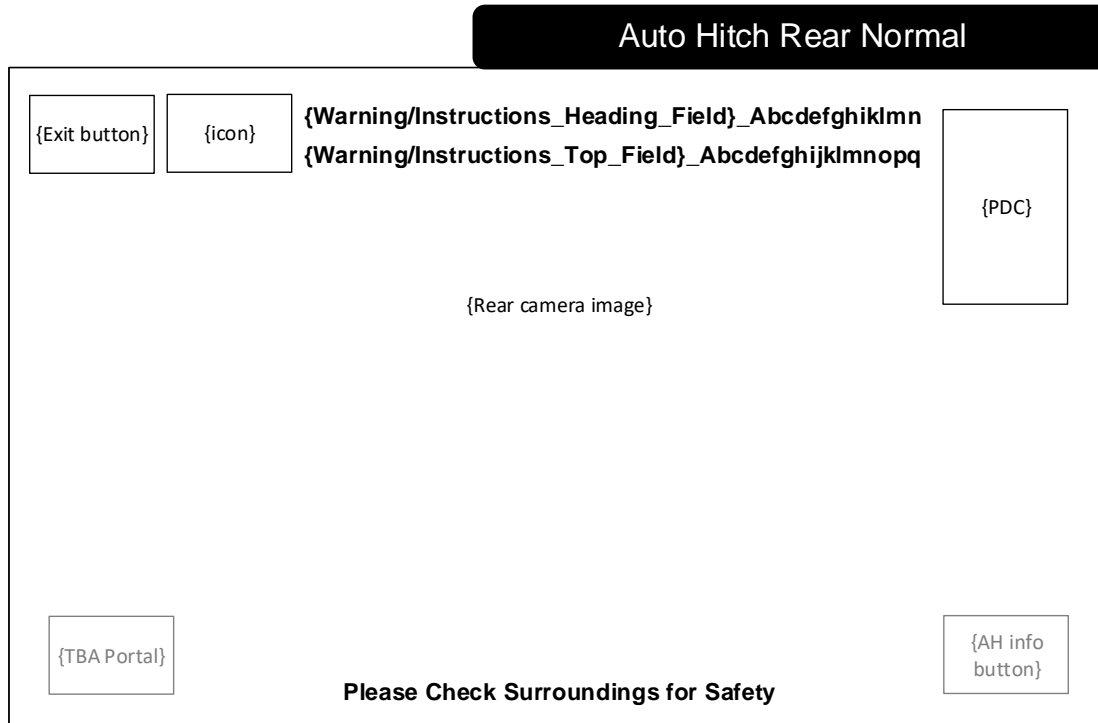

Sample Icons used for AH HMI Layouts

Finnish Hands-Off Info Down Arrow Caution Up Arrow Right Arrow Left Arrow Stop Left/Right Arr

Sample views available to the user.

1.3 Definitions

1.3.1 AHT-FUR-REQ-294534/B-Auto Hitch Client

Responsibility: The AutoHitchClient is the interface of the Auto Hitch (AH) feature. The AutoHitchClient is responsible for displaying a view rearward of the truck, AH maneuver messages, and/or graphics to driver during an AH session.

Review the implementation guide/static view/block diagram to locate the AutoHitch Image Client object.

1.3.2 AHT-FUR-REQ-294535/C-Auto Hitch Server

Responsibility:

The AH Server is responsible for determining the instructions and AH Status provided to the AH Client and for display to the AH feature user.

The AH Server is also responsible for determination of camera views provided to the AH Client.

1.4 Auto Hitch Client Interface

1.4.1 FUR-REQ-294964/E-Signal Mapping

Literal vs. Physical mapping requirement

APIM Tx/Rx	CAN Signal Name	Logical Signal Name
Rx	TrlrHitchMsgTxt_D_Rq	Autohitch_St
Rx	TrlrHitchIcon_D_Rq	IconRequest
Rx	FeatNolpmbActl	FeatureID
Rx	FeatConfigIpmbActl	ConfigNumber
Rx	PersIndexIpmb_D_Actl	PersIndex
Rx	GearLvrPos_D_Actl	GearLeverPos
Tx	TrlrHitch_D_RqMnu	DriverInput

1.4.2 AHT-FUR-REQ-294538/F-AH Feature ID Definition

The below table defines the Feature ID information related to the Feature Based Message Protocol command and control method for AH (Note: 0x81B is also used in the TBA2 and Rear View Camera feature).

Feature Name	Feature ID	Config Number	Config Value
Camera Showing	0x081B	0x00	Off
	
		0x17	Auto Hitch Rear Normal
	
		0x26	Auto Hitch Rear Hitch View
	
		0x47	Auto Hitch Rear Zoom View
	

1.4.3 Auto Hitch Image Client Rx

1.4.3.1 FUR-REQ-319292/A-Feature_St

Message Type: Status

Represents the current status of a feature (feature selected, feature setting, etc.).

Included Parameters:

FeatureID

Configuration

PersIndex

Name	Literals	Value	Description
FeatureID	-	-	Active feature number
		0x0000 – 0xFFFF	
Configuration	-	-	Active configuration value
		0x0000 – 0xFFFF	
PersIndex	-	-	Indicates which personality profile is active

	PERS_1	0x0	
	PERS_2	0x1	
	PERS_3	0x2	
	PERS_4	0X3	
	VEHICLE	0X4	
	Not Used	0x5	
	Not Used	0x6	
	Not Used	0x7	

1.4.3.2 AHT-FUR-REQ-294539/C-Autohitch_St

Message Type: Status

This signal communicates the system's operational state to the driver.

Name	Literals	Value	Description
Type	-	-	-
	NoMessage	0x00	
	Message1	0x01	
	Message2	0x02	
	Message3	0x03	
	Message4	0x04	
	Message5	0x05	
	Message6	0x06	
	Message7	0x07	
	Message8	0x08	
	Message9	0x09	
	Message10	0x0A	
	Message11	0x0B	
	Message12	0x0C	
	Message13	0x0D	
	Message14	0x0E	
	Message15	0x0F

	Message31	0x1F	
	Message32	0x20	
	Message33	0x21	
	Message34	0x22	
	Message35	0x23	
	Message36	0x24	
	Message37	0x25	

	Message38	0x26	
	Message39	0x27	
	Message40	0x28	
	Message41	0x29	
	Message42	0x2A	
	Message43	0x2B	
	Message44	0x2C	
	Message45	0x2D	
	Message46	0x2E	
	Message47	0x2F	
	Message48	0x30	
	Message49	0x31	
	Message50	0x32	
	Message51	0x33	
	Message52	0x34	
	Message53	0x35	
	Message54	0x36	
	Message55	0x37	
	Message56	0x38	
	Message57	0x39	
	Message58	0x3A	
	Message59	0x3B	
	Message60	0x3C	
	Message61	0x3D	
	Message62	0x3E	
	Message63	0x3F	

1.4.3.3 AHT-FUR-REQ-294540/C-IconRequest

Message Type: Status

This signal indicates the on-screen icon that is to be displayed to the driver.

Name	Literals	Value	Description
Type	-	-	-
	Nolcon	0x00	
	Icon1	0x01	
	Icon2	0x02	
	Icon3	0x03	
	Icon4	0x04	
	Icon5	0x05	
	Icon6	0x06	
	Icon7	0x07	
	Icon8	0x08

	Undefined_Treat_as_Fault	0xC	
	Undefined_Treat_as_Fault1	0xD	
	Unknown_Position	0xE	
	Fault	0xF	

1.4.4 Auto Hitch Client Tx

1.4.4.1 AHT-FUR-REQ-294546/E-DriverInput

Message Type: Request

Represents a request from the Autohitch Image Client to the Autohitch Activation Server to convey the driver's on-screen input to the feature algorithm

Name	Literals	Value	Description
Type	-	-	Driver input via touchscreen
	NoRequest	0x0	
	CancelAutohitch	0x1	
	TurnOnAutohitch	0x2	
	TurnOnTba	0x3	
	Confirm	0x4	
	GoToTrailerDomain	0x5	
	NotUsed_1	0x6	
	NotUsed_2	0x7	

2 General Requirements

2.1 AHT-FUR-REQ-294550/C-AH Interaction via Feature Based Message Protocol

Feature Base Message Protocol shall be used between AH Client and AH Server to synchronize and communicate the current camera view display (360, Normal) of Auto Hitch views.

The HMI Layout used by the AH Client shall be determined by the camera view status provided by the AH Server in order to ensure the HMI Layout applied by the Client is compatible with the Camera View supplied by the Server.

2.2 AHT-FUR-REQ-294552/H-AH HMI Display Requirements

Autohitch-related graphics shall be displayed when the following conditions are valid

- The AH Image Server is requesting Auto Hitch Rear Normal camera view (ConfigNumber== 0x17) or Auto Hitch Rear Camera Hitch view (ConfigNumber== 0x26) or Auto Hitch Rear Camera Zoom view (ConfigNumber== 0x47)
- The value of Autohitch_St is not 0x0
- Vehicle speed does not exceed the camera display maximum speed for 100ms, unless the value of Autohitch_St changes to Message44 or Message45 (for details see AHT-FUR-REQ-397066-Autohitch Vehicle Speed Exception.)

2.3 AHT-FUR-REQ-294554/D-Camera Image Priority

Auto Hitch event shall be treated as defined in spec H22A-Screen Interruption Table. Once the camera image has been displayed to user, the image shall be maintained as long as the conditions required to be in the particular camera view are present and shall have highest priority:

- In Autohitch feature, rearview camera is displayed regardless of the gear the vehicle is in. No pop-ups shall interrupt this video image, except the ones requested by Autohitch feature. (Autohitch displays rearview display even if the gear is in Drive)
- Pop-ups shall disappear when vehicle speed is greater than 0 KPH or if the driver shifts to reverse

2.4 AHT-FUR-REQ-294553/B-Auto Hitch Image Priority

Auto Hitch event shall be treated as defined in spec H22A-Screen Interruption Table.

2.5 AHT-FUR-REQ-294555/D-Autohitch Views

Autohitch Views

Autohitch Rear Normal View HMI Layouts shall be displayed by the AH Image Client when Feature_St has the encoding of FeatureID = 0x081B, Configuration = 0x17 AH Rear Normal.

Autohitch Rear Hitch View HMI Layouts shall be displayed by the AH Image Client when Feature_St has the encoding of FeatureID = 0x081B, Configuration = 0x26 AH Rear Hitch View or 0x47 AH Rear Zoom View.

2.6 AHT-FUR-REQ-347436/A-Autohitch HMI content references

The references to HMI screen layouts and other related HMI content are for reference only and not intended to depict the actual text, graphical, or layout content. Refer to the released HMI specifications for further detail on this type of content.

2.7 AHT-FUR-REQ-397066/A-Autohitch Vehicle Speed Exception

If the value of Autohitch_St is set to Message44 (0x2C) or Message45 (0x2D), the message shall be allowed to be displayed at any vehicle speed.

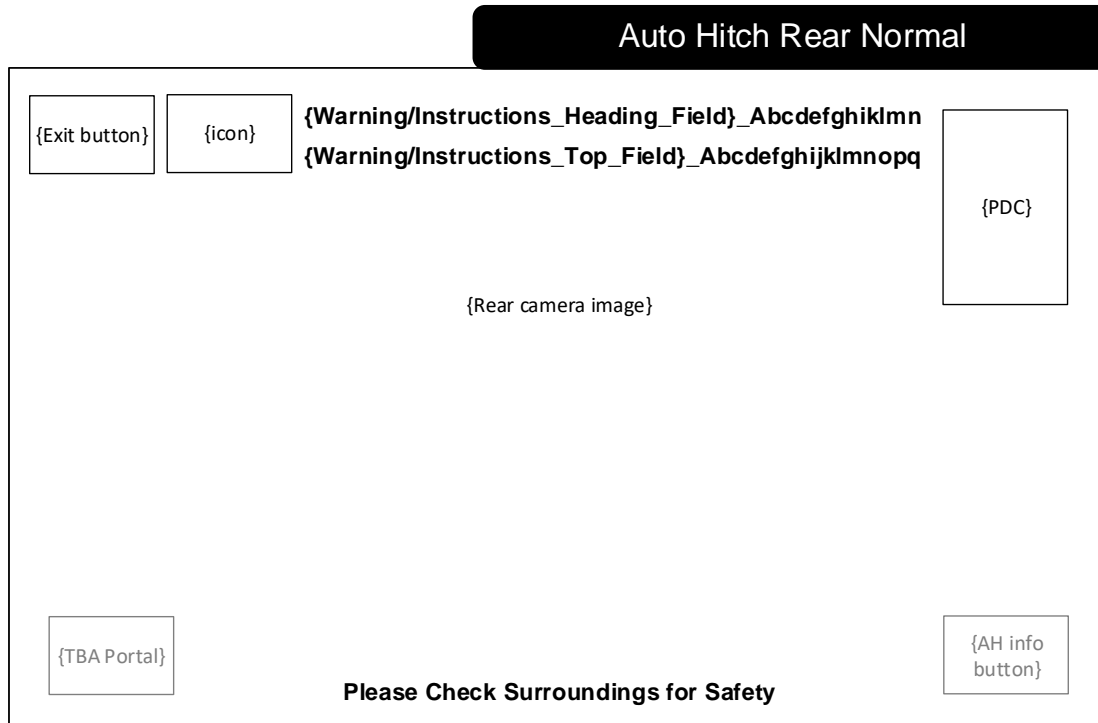

3 Functional Definition

3.1 AHT-FUN-REQ-343875/A-Display Auto Hitch

3.1.1 Requirements

3.1.1.1 AHT-FUR-REQ-323563/C-Info Button Availability

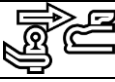

The Auto Hitch info button (Bottom right corner above) shall be disable/greyed if all of the following conditions are not met:

- When Vehicle speed is 0 KPH.

3.1.1.2 AHT-FUR-REQ-294562/D-Auto Hitch Signal Processing - Positional Icon1

0x3F	*Message63	No	{Command to Go to Trailing Domain}	M

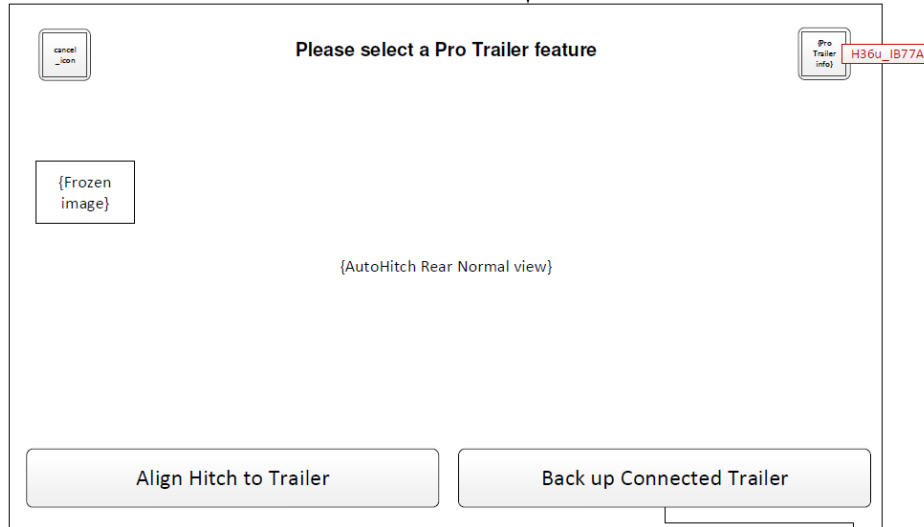

Note: Please refer to the AutoHitch HMI Text Mapping Table for the text strings of the instructions fields associated with each Message ID from the table above. *Message63 is not an AutoHitch screen with text strings and instead indicates a command to the AutoHitch Client to transition to the Trailing Domain as defined in the HMI specification.

3.1.1.4 FUR-REQ-319884/D-Auto Hitch Soft Button Requirements

The APIM shall track the status of each soft button available to the user. Debounce and arbitration of the softbutton status shall follow applicable Ford design standards and best practices. Only one button is allowed to register as pressed at any one time, no matter how many buttons the user is pressing simultaneously.

3.1.1.5 FUR-REQ-319885/E-Feature Selection by Soft Buttons

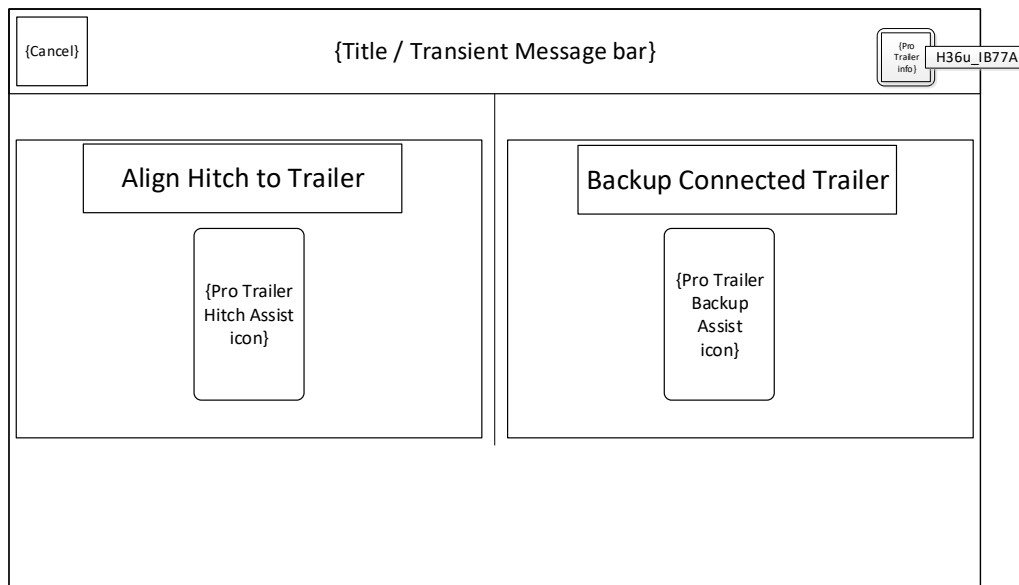

The output signal DriverInput shall be set according to the following table.

Soft Button Pressed	DriverInput
Align Hitch to Trailer	0x2_TurnOnAutohitch
Back Up Connected Trailer	0x3_TurnOnTba

The value of DriverInput shall be maintained until the value of Autohitch_St has changed to any value other than its last reported value, before setting the DriverInput signal value back to 0x0 NoRequest.

When {Pro Trailer info} button is selected, the Pro Trailer information screen shown in reference 12 of the AutoHitch HMI Text Mapping Table shall be displayed.

3.1.1.6 FUR-REQ-422924/A-Alternate Feature Selection by Soft Buttons

The output signal DriverInput shall be set according to the following table.

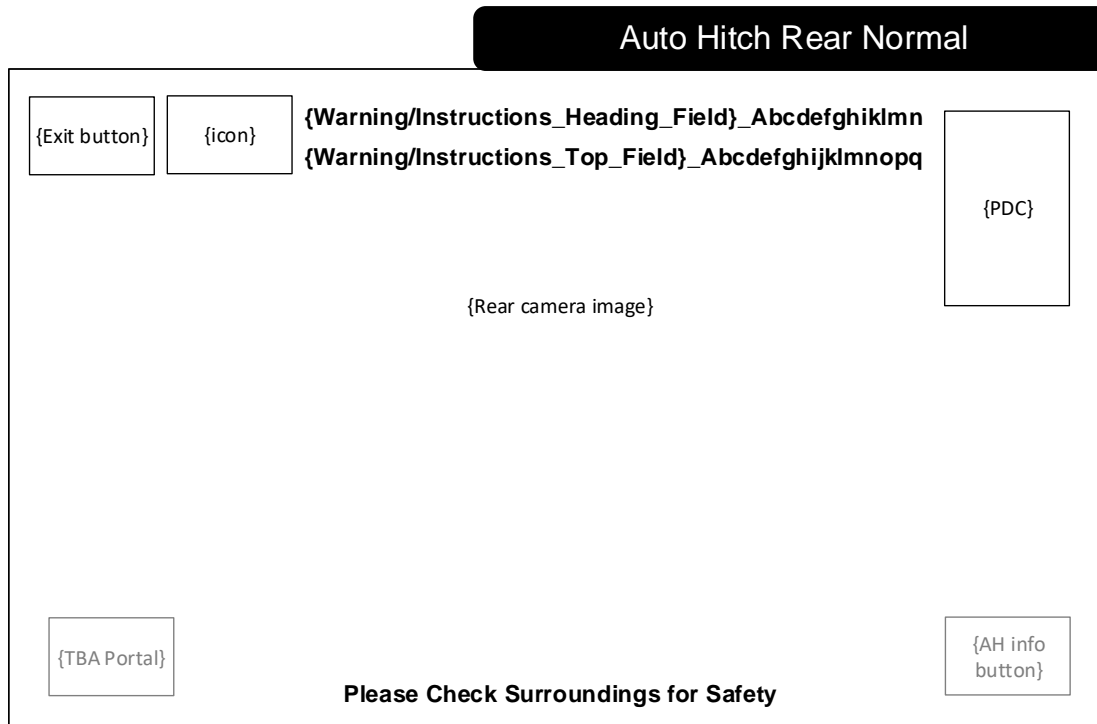

Soft Button Pressed	DriverInput
Align Hitch to Trailer	0x2_TurnOnAutohitch
Back Up Connected Trailer	0x3_TurnOnTba

The value of DriverInput shall be maintained until the value of Autohitch_St has changed to any value other than its last reported value, before setting the DriverInput signal value back to 0x0 NoRequest.

When {Pro Trailer info} button is selected, the Pro Trailer information screen shown in reference 12 of the AutoHitch HMI Text Mapping Table shall be displayed.

3.1.1.7 FUR-REQ-343766/A-TBA Selection by Soft Button

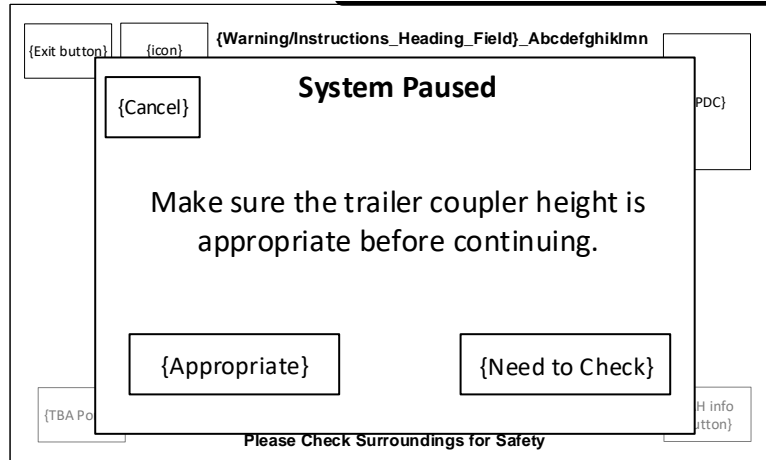

The output signal DriverInput shall be set according to the following table.

Soft Button Pressed	DriverInput
{TBA Portal}	0x3_TurnOnTba

The value of DriverInput shall be maintained until the value of Autohitch_St has changed to any value other than its last reported value, before setting the DriverInput signal value back to 0x0 NoRequest.

3.1.1.8 FUR-REQ-347395/B-Continue Selection by Soft Button

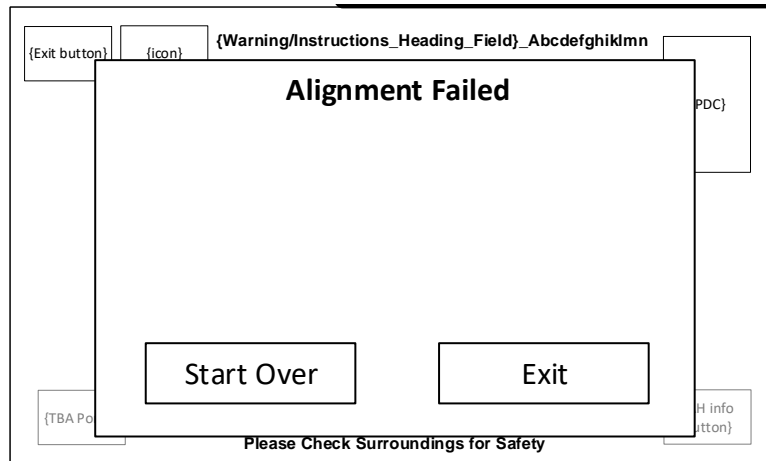

For the above layout, the output signal DriverInput shall be set according to the following table.

Soft Button Pressed	DriverInput
{Appropriate}	0x4 Confirm
{Need to Check}	0x2 TurnOnAutohitch
{Cancel}	0x1 CancelAutohitch

The value of DriverInput shall be maintained until the value of Autohitch_St has changed to any value other than its last reported value, before setting the DriverInput signal value back to 0x0 NoRequest.

3.1.1.9 FUR-REQ-347435/A-Start Over Selection by Soft Button

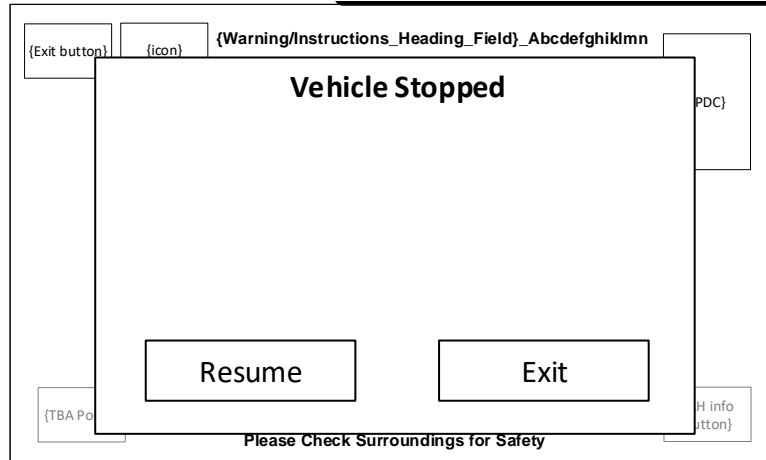

For the above layout, the output signal DriverInput shall be set according to the following table.

Soft Button Pressed	DriverInput
Start Over	0x4 Confirm
Exit	0x1 CancelAutohitch

The value of DriverInput shall be maintained until the value of Autohitch_St has changed to any value other than its last reported value, before setting the DriverInput signal value back to 0x0 NoRequest.

3.1.1.10 REQ-371605/A-Driver Early Abort Selection by Soft Button

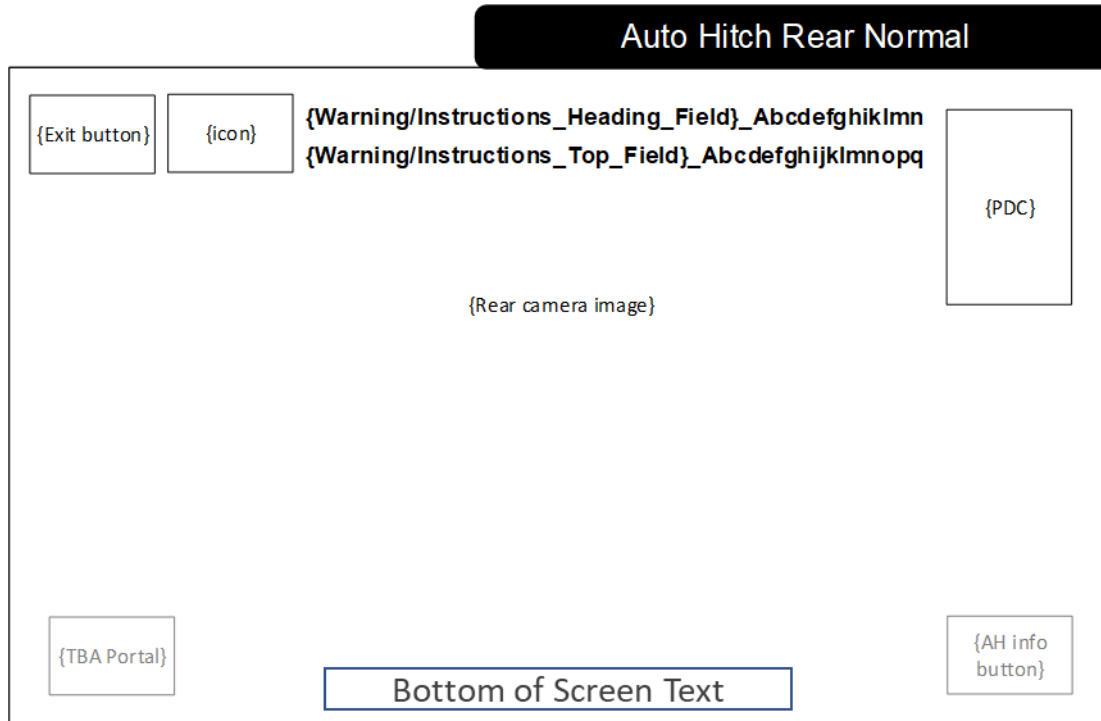

For the above layout, the output signal DriverInput shall be set according to the following table.

Soft Button Pressed	DriverInput
Resume	0x4 Confirm
Exit	0x1 CancelAutohitch

The value of DriverInput shall be maintained until the value of Autohitch_St has changed to any value other than its last reported value, before setting the DriverInput signal value back to 0x0 NoRequest.

3.1.1.11 REQ-371606/B-AutoHitch "Rear Normal" view and "Rear Hitch" view

The client shall display the AutoHitch "Rear Normal" view screen format while the ConfigNumber== 0x17.

The client shall display the AutoHitch "Rear Hitch" view screen format while the ConfigNumber== 0x26.

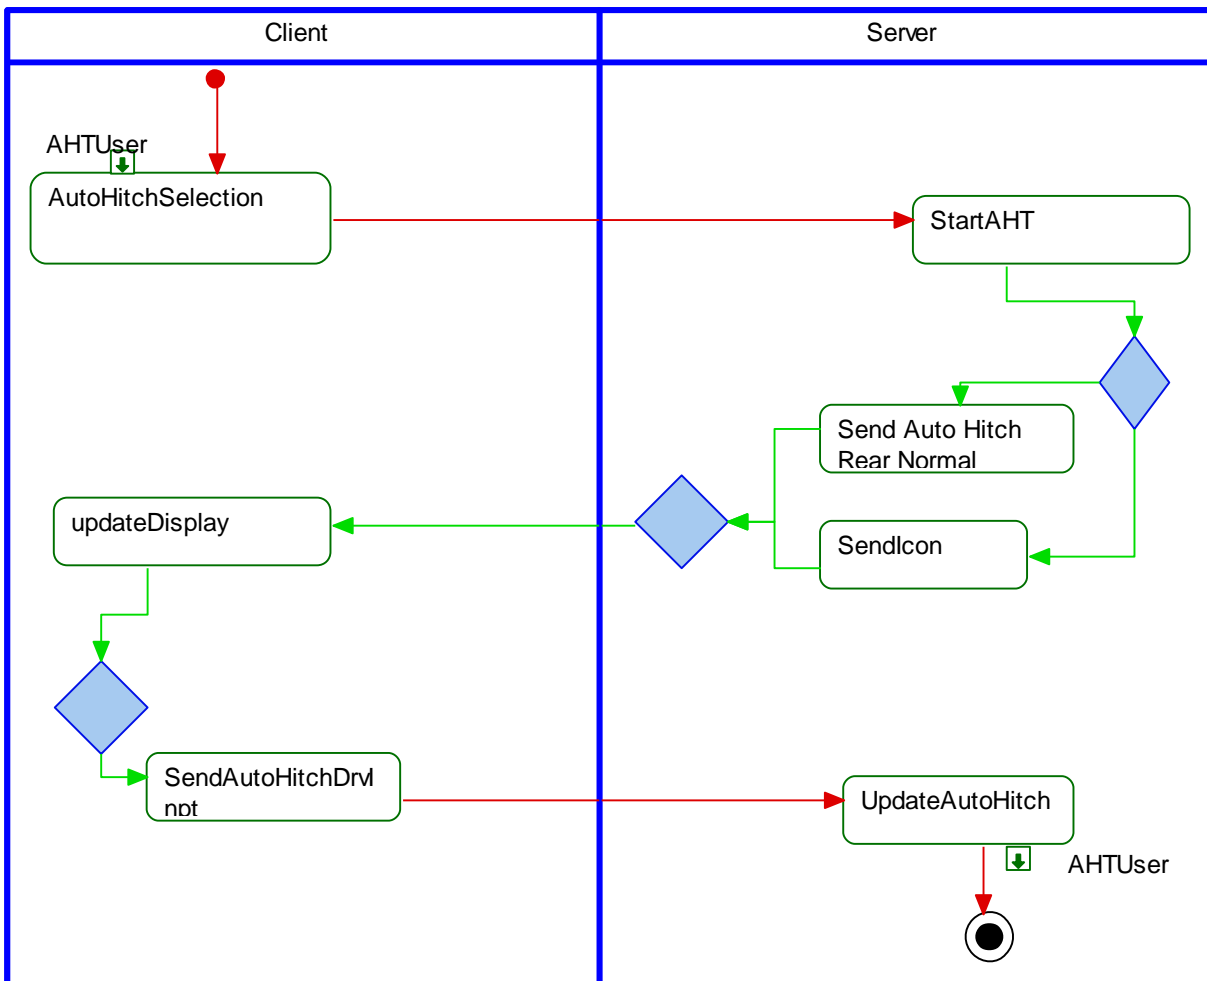

The client shall display the AutoHitch “Rear zoom” view screen format while the ConfigNumber== 0x47.
The message at the bottom of the screen shall be displayed as described below:

- The Client shall display “Text A” for the bottom of screen message, in AutoHitch ‘Rear Normal’ view.
- The Client shall display “Text A” for the bottom of screen message, in AutoHitch ‘Rear Hitch’ or “Rear Zoom” view, when message #25 (0x19) is requested.
- The Client shall display “Text B” for the bottom of screen message, in AutoHitch ‘Rear Hitch’ or “Rear Zoom” view, except when message #25 (0x19) is requested.
- “Text A” and “Text B” are defined in the Auto Hitch HMI Text Mapping Table, reference 15.

3.1.2 Use Cases

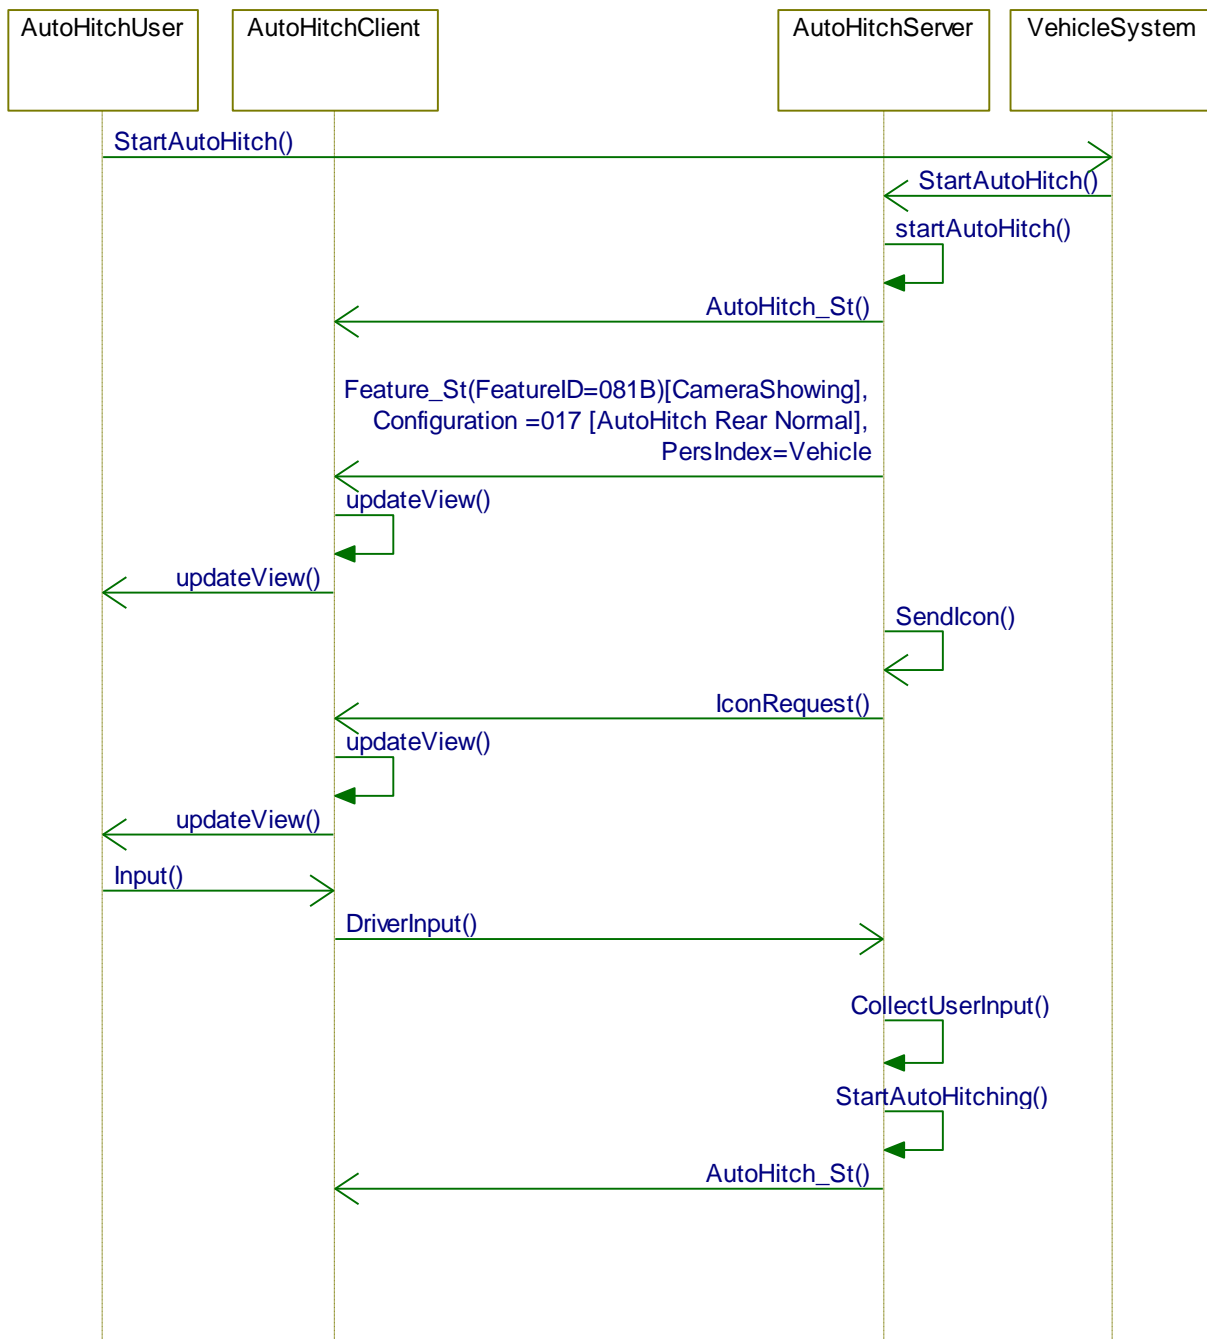

3.1.3 White Box View

3.1.3.1 AHT-ACT-REQ-302424/B-Auto Hitch AD

3.1.3.2 AHT-SD-REQ-302425/C-Auto Hitch SD

3.2 Auto Hitch Exit

3.2.1 Requirements

3.2.1.1 AHT-FUR-REQ-294566/C-Cancel Auto Hitch when Camera Feed is Missing

In the event the camera feed is missing, the Auto Hitch Client shall set DriverInput to a value of 0x1_CancelAutohitch while Autohitch_St >= 0x1. Once the feature is cancelled, the request should be reset to 0x0_NoRequest.

3.2.1.2 AHT-FUR-REQ-319291/C-Cancel Auto Hitch on Request from Driver

When the driver presses the Exit button on the touchscreen, the Auto Hitch Client shall set DriverInput to a value of 0x1_CancelAutohitch while Autohitch_St >= 0x1. The value of DriverInput shall be maintained until the value of Autohitch_St has changed to any value other than its last reported value, before setting the DriverInput signal value back to 0x0_NoRequest.
