1 FUNCTION SPECIFICATION

1.1 Function Overview

1.1.1 Function Description

Around View Monitor Function

The Around View Monitor (AVM) function of Enhancement DAT has made some upgrades compare with Surround View Cameras.

- It supports 3D view (front view, rear view, rear left view, rear right view and any angle view) screen and switch angles by gesture.
- It supports automotively active AVM screen when open turn light or steering wheel angle big than 120° or obstacle approach trigger.
- It supports self-calibration function, through road self-learning to complete calibration.

1.1.2 Function Variants

No Variants identified for Around View Monitor Function

1.1.3 Assumptions

No Assumptions specified.

1.2 Function Scope

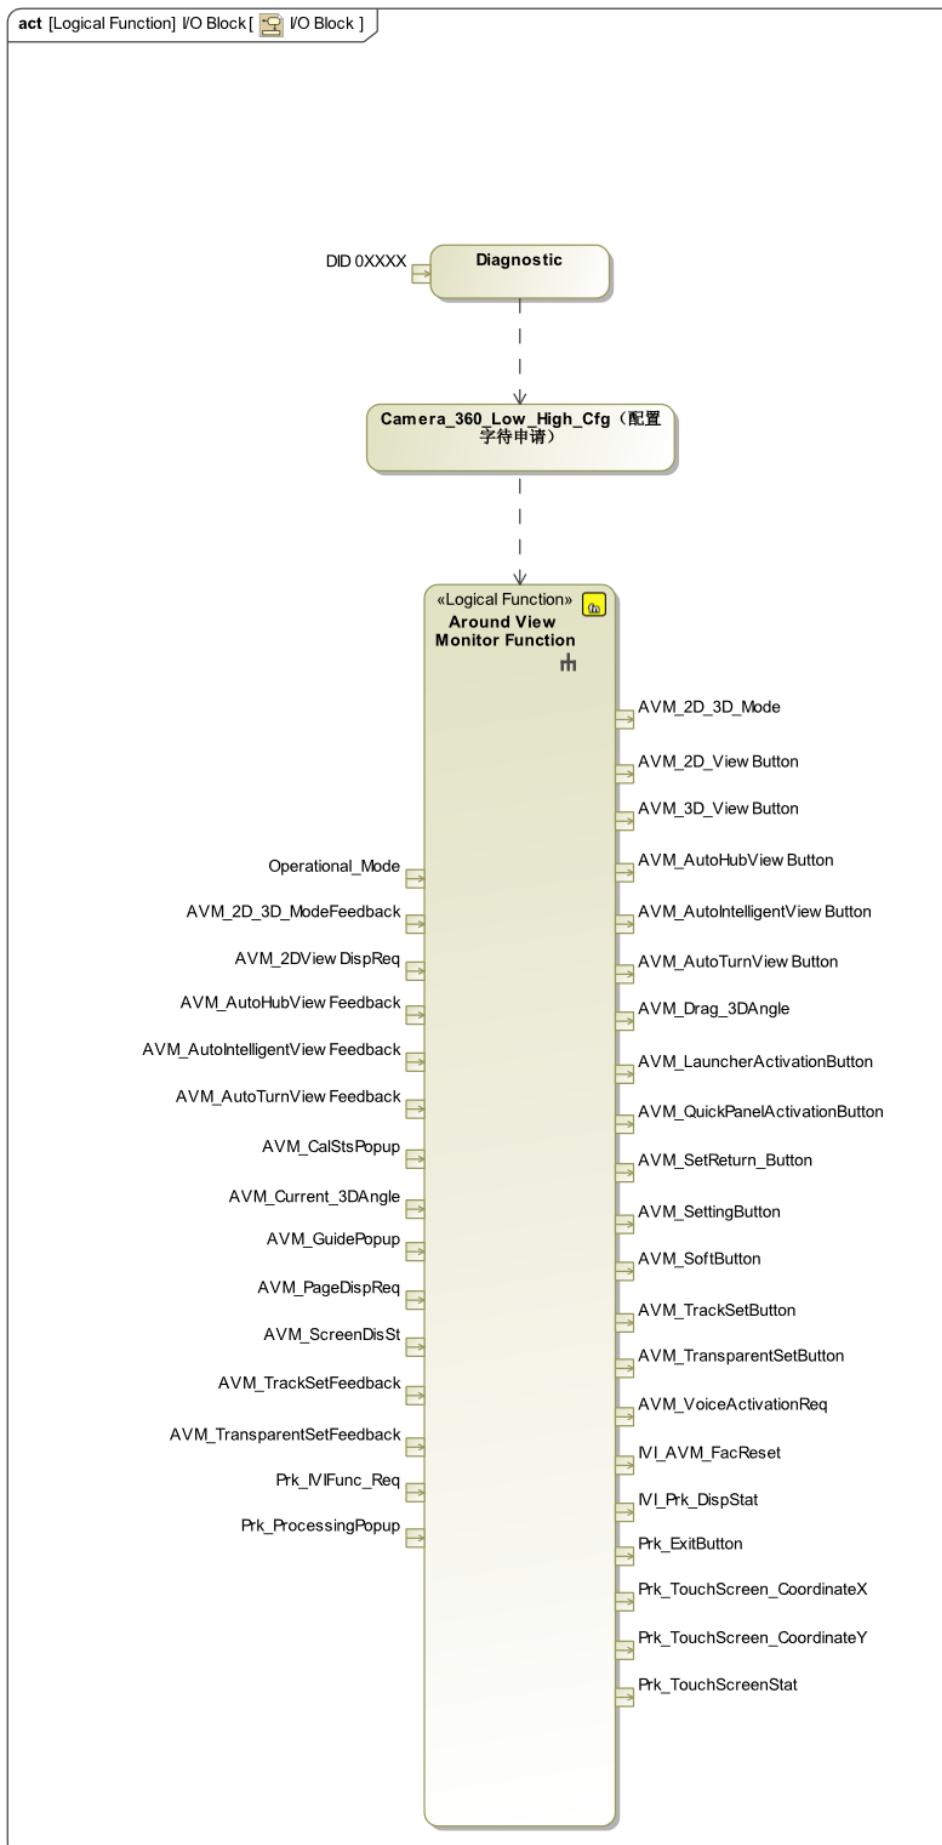

The  – “Around View Monitor Function” function is called by the following functions:

-  – “[I/O Block](#)”

1.2.1 I/O Block
