

# 1 HUD Infotainment Quick Action Menu Button Control Mirror Function – CGEA1.3

## 1.1 Functional Description

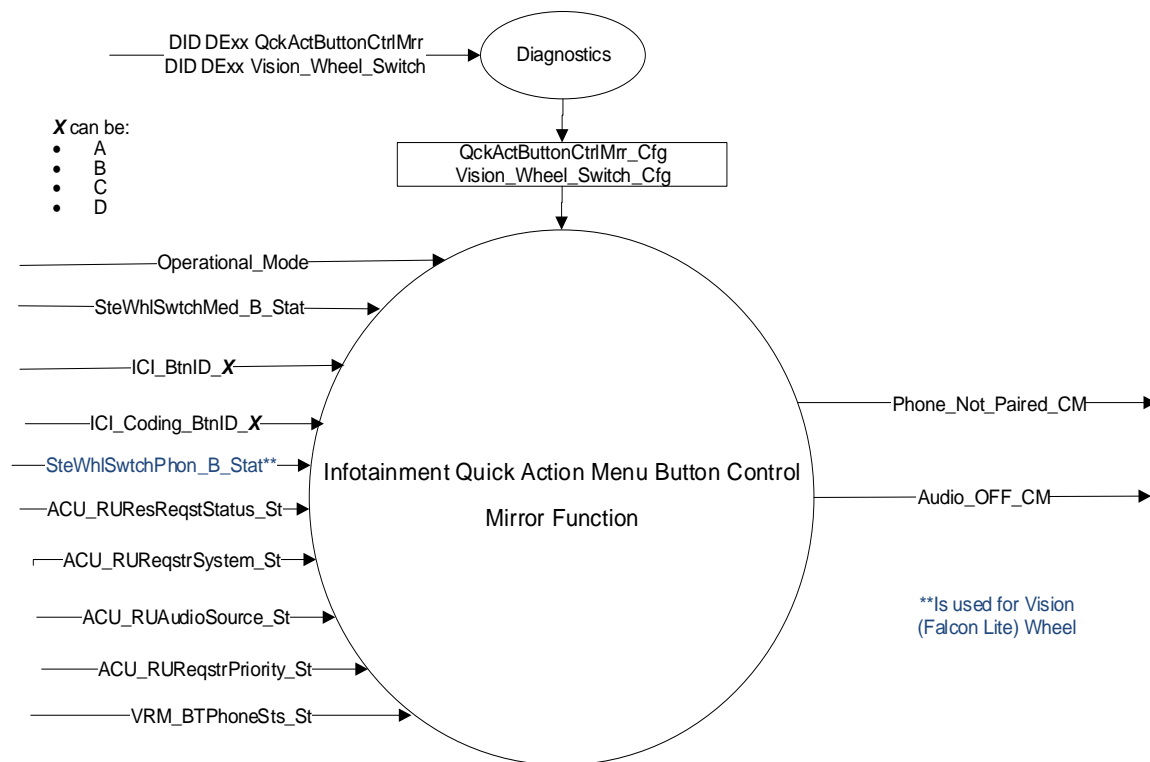

This specification triggers control mirrors in HUD, when certain infotainment quick action menu buttons in steering wheel ends up with no action in Cluster.

- When Audio is OFF and the user presses the Media Quick-Action Button, the proposal is to display an “Audio Off” control mirror.
- When a phone is not paired and the user presses the Phone Answer (Send) Quick-Action Button, the proposal is to display a “Phone Not Paired” control mirror.
